MME Admission Requirements
(Appplies to students gaining 300-level course admission fall 2016/AY 2016-17)

Terms of Admission & Deadlines
- Fall term of admission only
- Annual application deadline for fall is May 15, 2016
- Online application goes live January 4, 2016

Minimum Eligibility for Consideration
- Freshman Inquiry (for those who began PSU as freshmen) or WR 121 and COMM 220 (for transfer students) must be completed prior to fall 2016
- All shaded/required courses on the blue sheet/course plan completed with a C or above, prior to fall, and at least a 2.25 GPA in shaded/required courses (excluding Freshman Inquiry or, for transfers, WR 121 and COMM 220) using the PSU Repeat Policy.

Selective Admission
- Using the above criteria, the students will be ranked by GPA
- Selective Admission will not be calculated for any student until Spring Grades are posted
- Admission will be offered to the top students (approximately 90), including conditionally admitted students
  - Conditionally admitted students will have an opportunity to complete up to 2 missing shaded/required courses during the summer term. If the student does his/her due diligence and cannot locate the necessary course(s) at PSU or local community colleges, is it possible for the condition to extend through the end of fall term. This extension would need to be approved by MME Advisor, Derek Tretheway. Official transcripts will need to be provided to both PSU and the Department, as soon as grades are posted, to determine if the condition has been met.
- Notification of admissions status will be sent after July 15, 2016

Repeated Classes
- The MME Department follows the PSU repeat policy

Required classes
- All required/shaded classes must be completed prior to fall 2016
- No more than 2 shaded/required courses may be in progress during summer 2016 (excluding Freshmen Inquiry or WR 121/COMM 220).
  Example:
  - OK= summer 2016 classes Math 256, PH 223/216, and COMM 220 (3 classes, only 2 are shaded/required)
  - Not OK= summer 2016 Math 256, PH 223/216 and ECE 241 (this would be 3 shaded/required courses, which is one too many)
Additional testing/bridge classes
- No testing required
- Students who did not complete ME 120, 121 and 122 at PSU are strongly encouraged to take the summer bridge course: ME 299 Sensors and Controls Bridge. This bridge course may be required as a condition of admission by the Admission Committee.

Pass/No Pass
- Required classes must be taken for a grade (not P/NP)
- If a student earns a NP in a required class it will be calculated in selective admission GPA as an F

Department Communication Plan
- Fall 2017 admission requirements available spring 2016 (in time for fall 2016 registration in May 2016)
