INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Members of the Board Portland State University - Single Audit Portland, Oregon

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the business-type activities and the discretely presented component unit of Portland State University (the University), as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the University's basic financial statements, and have issued our report thereon dated December 18, 2015. Our report includes a reference to other auditors who audited the financial statements of the discretely presented component unit, as described in our report on the University's financial statements. The financial statements of the discretely presented component unit, as described in our report on the University's audited in accordance with *Government Auditing Standards*.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the University's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as described in the accompanying the schedule of findings and questioned costs, we identified a certain deficiency in internal control that we consider to be a material weakness.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the deficiency described as item 2015-001 in the accompanying the schedule of findings and questioned costs to be a material weakness.

An independent member of Nexia International

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the University's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Portland State University's Response to Findings

The University's response to the finding identified in our audit is described in the accompanying schedule of findings and questioned costs. The University's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE WITH REQUIREMENTS THAT COULD HAVE A DIRECT AND MATERIAL EFFECT ON EACH MAJOR FEDERAL PROGRAM, ON INTERNAL CONTROL OVER COMPLIANCE, AND ON THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS IN ACCORDANCE WITH OMB CIRCULAR A-133

Members of the Board Portland State University Portland, Oregon

Report on Compliance for Each Major Federal Program

We have audited Portland State University's (the University) compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of the University's major federal programs for the year ended June 30, 2015. The University's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of the University's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the University's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the University's compliance.

Opinion on Each Major Federal Program

In our opinion, Portland State University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2015.

Other Matters

The results of our auditing procedures disclosed instances of noncompliance, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as items 2015-002 through 2015-006 and 2015-008. Our opinion on each major federal program is not modified with respect to these matters.

The University's responses to the noncompliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. The University's responses were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.

Report on Internal Control over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the University's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiencies, in internal control over compliance with a type of compliance of deficiencies, in internal control over compliance with a type of deficiencies, in internal control over compliance with a type of deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, we identified certain deficiencies in internal control over compliance, as described in the accompanying schedule of findings and questioned costs as items 2015-002 through 2015-008 that we consider to be significant deficiencies.

The University's responses to the internal control over compliance findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. The University's responses were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the result of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Expenditures of Federal Awards Required by OMB Circular A-133

We have audited the financial statements of the business-type activities and the discretely presented component unit of the University as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the University's basic financial statements. We issued our report thereon dated December 18, 2015, which contained unmodified opinions on those financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the schedule of expenditure of federal awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

Note A – Basis of Presentation

The accompanying Schedule of Expenditures of Federal Awards (the "Schedule") includes the federal award activity of Portland State University (PSU) for the year ended June 30, 2015. The information in this Schedule is presented in accordance with requirements of OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations." Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of the basic financial statements. The Federal Perkins Loans amount of \$8,307,699 represents total student Perkins loans outstanding as of June 30, 2015. Matching costs, the nonfederal share of certain program costs, are not included in the Schedule.

Note B – Summary of Significant Accounting Policies

Expenditures reported on the Schedule are reported on the modified accrual basis of accounting. Such expenditures are recognized following the cost principles contained in OMB Circular A-21, Cost Principles for Education Institutions, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Negative amounts shown on the Schedule represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years. Pass-through entity identifying numbers are presented where available.

Note C – Relationship to Federal Financial Reports

The regulations and guidelines governing the preparation of Federal financial reports vary by Federal agency and among programs administered by the same agency. Accordingly, the amounts reported in the Federal financial reports do not necessarily agree with the amounts reported in the accompanying Schedule which is prepared on the basis explained in Note A.

Note D – Sub-Recipients

During the fiscal year ended June 30, 2015, PSU disbursed federal funding to various program recipients from the following federal programs:

CFDA Number	Major Subdivision - Program Title	Expenditures
10.310	National Institute of Food and Agriculture - Agriculture and Food Research Initiative (AFRI)	\$48,563
10.652	US Forest Service - Forestry Research	7,020
11.312	National Oceanic & Atmospheric Administration - Research and Evaluation Program	10,791
11.417	National Oceanic & Atmospheric Administration - Sea Grant Support	1,050
12.300	Office of the Chief of Naval Research - Basic and Applied Scientific Research	104,234
12.420	US Army Medical Command - Military Medical Research and Development	125,588

15.232	Bureau of Land Management - Wildland Fire Research and Studies Program	2,389
16.541	Office of Juvenile Justice & Delinquency Prevention - Juvenile	
	Justice and Delinquency Prevention Special Office of Juvenile Justice & Delinguency Prevention - Juvenile	73,454
16.726	Mentoring Program	70,937
20.205	Federal Highway Administration - Highway Planning and Construction	56,357
20.701	Office of the Secretary - University Transportation Centers Program	686,647
20.XXX	US Department of Transportation	33,290
43.001	Science - Aerospace Education Services Program	27,883
45.312	Institute of Museum and Library Services - National Leadership Grants	4,959
47.049	Mathematical and Physical Sciences	56,915
47.050	Geosciences	536,389
47.074	Biological Sciences	116,304
47.076	Education and Human Resources	92,089
47.078	Polar Programs	664
66.461	Office of Water - Regional Wetland Program Development Grants	42,567
66.708	Office of Chemical Safety and Pollution Prevention - Pollution Prevention Grants Program	15,723
81.XXX	Other Department of Energy Programs	50,454
84.010	Office of Elementary and Secondary Education - Title I Grants to Local Educational Agencies	27,145
84.021	Office of Postsecondary Education, Overseas Programs - Group Projects Abroad	
84.133	USDE - National Institute on Disability and Rehabilitation	944
	-	39,577
84.324	Institute of Education Sciences - Research in Special Education	25,198
84.412	Race to the Top - Early Learning Challenge	187,100
93.136	Centers for Disease Control & Prevention - Injury Prevention and Control Research and State Grants	187,448
93.273	National Institutes of Health - Alcohol Research Programs	70,405
93.286	National Institutes of Health - Discovery and Applied Research for Technological Innovations to Improve Human Health	17,622
93.310	National Institutes of Health - Trans-NIH Research Support	194,556
		171,000

	Total Federal funds passed through to sub-recipients	\$3,557,600
93.958	Substance Abuse & Mental Health Administration - Block Grants for Community Mental Health Services	15,569
93.865	National Institutes of Health - Research for Mothers and Children	132,603
93.859	National Institutes of Health - Pharmacology Physiology and Biological Chemistry	53,608
93.855	National Institutes of Health - Allergy Immunology and Transplantation Research	330,531
93.605	Administration for Children & Families - Family Connection Grants	111,027

PORTLAND STATE UNIVERSTIY SCHEDULE OF FINDINGS AND QUESTIONED COSTS For the Year Ended June 30, 2015

SECTION I – SUMMARY OF AUDITORS' RESULTS

Financial Statements

Type of auditors' report issu	ued:	Unmodifie	d	
Internal control over financi	al reporting:			
• Material weakness(es)	identified?	\boxtimes yes	no	
 Significant deficiency(ie considered to be may 	es) reported that are not aterial weakness(es)?	🗌 yes	⊠ none reported	
Noncompliance material to	financial statements noted?	🗌 yes	🖂 no	
Federal Awards

	es) identified that are not aterial weakness(es)?	🛛 yes	none reported	
Type of auditors' report issu for major program:	ued on compliance	Unmodified		
Any audit findings disclosed reported in accordance Circular A-133?		🛛 yes	🗌 no	
Identification of major progr	ram:			
CFDA Number(s) Name of Federal Program or Cluster				
84.SFA R&D 84.TRIO 93.CCDF	Student Financial Aid Cluste Research and Development TRIO Cluster Child Care Development Fur	Cluster	CCDF Cluster)	
Dollar threshold used to distinguish between type A and type B programs \$1,100,360				
Auditee qualified as low-ris	k auditee?	🗌 yes	🖂 no	

PART II – FINDINGS RELATED TO FINANCIAL STATEMENTS

Finding 2015-001 Accounting for Certain Contracts Material Weakness

Criteria:

The University should have controls in place over financial reporting to prevent material error from occurring within the financial statements.

Condition:

During the audit, the following two material misstatements were noted:

- 1) The University brought to our attention that, over the years, the University was assessed debt by the City of Portland (the City) in the form of Local Improvement District (LID) obligations as evidenced by contract signed by the University and the City. Such obligations were assessed over the years for capital improvements made by the City near the University. Since inception of the first obligation, the University expensed the payments as paid. In fiscal year 2015, the contracts were re-examined by management and it was determined that long-term liabilities should have been recorded at the time the LID obligations were assessed by the City.
- 2) During fiscal year 2015, the University entered into a space use agreement with Oregon Heath and Science University (OHSU). Per the contract, OHSU paid the University \$6.5 million for the future use of space in the University's Viking Pavilion and Academic Center (under construction). During fiscal year 2015, rather that treating this payment as prepaid rent received and deferring the revenue, the University recognized the full \$6.5 million as revenue.

Effect:

For the LIDS obligation, the University recorded an adjusting entry to record the liability as of June 30, 2015 and passed on an adjustment to restate the financial statements for \$3.8 million. As a result of the adjustment passing through the current year, current year expenses were overstated by this amount. For the agreement for OHSU, as adjustment for \$6.5 million was made to reduce revenue and to record this amount as unearned revenue.

Recommendation:

For contracts entered into by the University, the University should:

- a) Adopt a policy that requires certain contracts be shared with the Finance Department for analysis. Criteria for review should be established and should consider factors such as materiality/amount, complexity, routine vs non-routine, and other considerations.
- b) Once routed to the Finance Department, the Department should prepare a written analysis of its conclusion of how to account for the contract in accordance with generally accepted accounting principles. This written analysis should be reviewed and approved and maintained to support the University's position on the matter.

Views of responsible officials and planned corrective actions:

Management agrees with the recommendation. The controller's office will work with the contracting and procurement services and other relevant departments to determine how to best capture the full population of contracts and establish the parameters for reviewing contracts for accounting and financial reporting implications. Documentation may be in the form of a checklist or memorandum depending on the nature of the contract.

Contact:

Jennifer Kahl, Controller, (503) 725-5096

PART III - FEDERAL AWARD FINDINGS AND QUESTIONED COSTS

Finding 2015-002 Return of Title IV Funds (R2T4) Significant Deficiency, Noncompliance

DEPARTMENT OF EDUCATION Federal Supplemental Educational Opportunity Grants (SEOG) – CFDA # 84.007 Federal Work Study Program (FWS) – CFDA # 84.033 Federal Perkins Loan (FPL) – CFDA # 84.038 Federal Pell Grant Program (PELL) – CFDA # 84.063 Federal Direct Student Loans (FDL) – CFDA # 84.268 Teacher Education Assistance for College and Higher Education Grants (TEACH) – CFDA # 84.379

Criteria:

When a recipient of Title IV grant or loan assistance withdraws from an institution during a payment period or period of enrollment in which the recipient began attendance, the institution must determine the amount of Title IV aid earned by the student as of the student's withdrawal date. If the total amount of Title IV assistance earned by the student is less than the amount that was disbursed to the student or on his or her behalf as of the date of the institution's determination that the student withdrew, the difference must be returned to the Title IV programs within 45 days as outlined in this section and no additional disbursements may be made to the student for the payment period or period of enrollment.

Condition:

During testing, we noted that the University used the incorrect last day of the terms when calculating the percentage of aid earned by students. In addition, we noted that for the month of October 2014 the financial aid office incurred a manual error resulting in 98 of the returns for that report period to be returned late (not within the 45 days).

Context:

The University was using the academic calendar established by the Oregon University System to determine student attendance. The University should have been using their own academic calendar, as it was different from the Oregon University System calendar. For the late returns made during the month of October, we noted 98 returns made for that month that were not performed within the 45 day required time period.

Cause:

This error in using the incorrect term dates was due to the University becoming a separate legal entity from the Oregon University System in the current year. In addition, the key control in place for October 2014 did not function as designed and funds were returned beyond the 45 day requirement.

Effect:

The University miscalculated R2T4 calculations for 100% of the students tested. In addition, the University failed to timely return funds for 98 students in October 2014.

Questioned Costs:

\$176 represents the error in returned funds due to the University using the incorrect term dates.

Recommendation:

We recommend that the University use their own academic calendar when calculating student aid earned. We recommend that the University implement a control process over R2T4 that will not allow funds to be returned past the 45 days.

Views of responsible officials and planned corrective actions:

Management agrees with the finding that for a short period in October 2014 R2T4 calculations for some withdrawn students were delayed, resulting in PSU's returning funds to the U.S. Department of Education later than the 45 days allowed in regulation.

Management also agrees that an academic calendar was used for the R2T4 calculations, which, while official since it had been provided by the Oregon University System, was one day different from the one that reflects the beginning and ending dates of PSU's class and exam schedule.

We will also communicate with the Registrar to ensure that we are using the correct academic calendar.

The Registrar's Office agrees with the finding related to the PSU academic calendar dates, and believes Financial Aid staff can use the official Academic Calendar to find the applicable term begin/end dates. The PSU Academic Calendar is published three years out and can be found on the Registrar's Office website.

Contact:

G. Michael Johnson Director of Student Financial Aid (503) 725-5442

Finding 2015-003 Enrollment Reporting Significant Deficiency, Noncompliance

DEPARTMENT OF EDUCATION

Federal Pell Grant Program (PELL) – CFDA # 84.063 Federal Direct Student Loans (FDL) – CFDA # 84.268

Criteria:

The Federal Code of Regulations (685.309(b) for Direct Lending and 690.83(b) for Pell) require schools to update all information included in the enrollment report from the National Student Loan Data System (NSLDS) and return the report within the prescribed timeframe (30 days). In addition, schools are required to make necessary corrections, and return, within the prescribed timeframe (ten days) for any report errors subsequently noted by NSLDS.

Condition:

Review of enrollment reporting data from the University showed that errors were not corrected and returned to NSLDS within the prescribed timeframe.

Context:

The University utilizes the National Student Clearinghouse (NSC) to report student information to NSLDS. After uploading batch roster updates to NSLDS within the required timeframe, the University's error/acknowledgment file from NSLDS is available to them via their NSC services. In an attempt to correct the errors, NSC resubmitted the files within the required 10 days but unfortunately, some of those records continued to not pass the NSLDS enrollment reporting edits and we noted no additional uploads by NSC to correct these errors until the next enrollment roster request from NSLDS.

Cause:

The University did not properly monitor that the third party was uploading error corrections timely. Universities have noted there has been an error in the NSC process and they have made institutions aware of it, providing letters to the institutions for submission to any audits if necessary.

Effect:

The University was not in compliance with error reporting requirements as noted above.

Questioned Costs:

None noted

Recommendation:

We recommend that the University work with their service provider to implement a process to ensure that all rosters are accurately uploaded, or corrected, in a timely manner to NSLDS.

Views of responsible officials and planned corrective actions:

Registrar's Office management agrees with the finding, being aware of the difficulties introduced by the new NSLDS reporting standards defined to support the 150% legislation. This created an increased volume of errors in the NSC – NSLDS SSCR validation process. Representatives from the Registrar's Office and Office of Financial Aid spoke with NSC operations specialists to find out the nature of the new errors and what could be done to resolve the high numbers. The vast majority of the errors were caused by new reporting standards that were not matched between NSC and NSLDS. The NSC is working to meet all the newly defined data standards. There are a few errors that require the school to update individual records within the NSC database in order to fit updated standards. These updates will be incorporated into standard NSC error report updates so that NSLDS SSCR error rates will be reduced and eventually eliminated.

The NSC has announced a change effective December 31, 2015, that will automatically add students to the SCCR roster who may have received aid at previous institutions but are not receiving aid at our institution. The Registrar's Office will continue to take the lead in working with NSC to improve the process and correct the NSLDS errors as quickly as possible.

Contact:

Cindy Bacaar Associate Vice Provost and University Registrar, Academic Affairs (503) 725-5533

Finding 2015-004 Subrecipient Monitoring Significant Deficiency, Noncompliance

Research and Development Cluster

Criteria:

An entity passing through funds is responsible for ensuring that subrecipients expending \$500,000 or more in Federal awards during the subrecipient's fiscal year for fiscal years ending after December 31, 2003 as provided in OMB Circular A-133 have met the audit requirements of OMB Circular A-133 and that the required audits are completed within 9 months of the end of the subrecipient's audit period; (2) issuing a management decision on audit findings within 6 months after receipt of the subrecipient's audit report; and (3) ensuring that the subrecipient takes timely and appropriate corrective action on all audit findings. In cases of continued inability or unwillingness of a subrecipient to have the required audits, the pass-through entity shall take appropriate action using sanctions.

Condition:

When testing CFDA 93.855, we noted that the University sends a form to subrecipients inquiring about completion of A-133 audits; however, the University does not obtain a copy of the A-133 to determine whether or not the subrecipient had any findings, which would require follow-up and/or a management decision.

Context:

Upon inquiry, the University does send out questionnaires to subrecipients requesting data contained on the subrecipient's A-133 audit. However, we noted no instances where the University corroborated this information.

Cause:

The University did not have a process in place to monitor subrecipients properly that would allow them to corroborate subrecipient information and assess whether or not follow up procedures should be performed.

Effect:

A subrecipient's noncompliance with federal programs regulations over funds that are passing through the University may go undetected.

Questioned Costs:

None.

Recommendation:

We recommend that the University implement a more robust process surrounding their subrecipient monitoring and ensure they are in compliance with federal regulations.

Views of responsible officials and planned corrective actions:

Response: Portland State University generally concurs with this finding. PSU's office of Sponsored Projects Administration (SPA) currently applies a risk-based approach to subrecipient monitoring that relies as a minimum on annual reporting and certification regarding audit findings by its subrecipients. It is a common business practice for recipients of federal funding to rely on subrecipient organizations to certify their compliance with the requirements outlined in the award document.

Corrective Action:

 SPA will continue the practice of relying on annual A-133 certifications for low-risk subrecipients but will implement a process to corroborate the information reported on certifications provided by institutions deemed higher risk as identified through a formal risk assessment process and develop a more formal monitoring program based on the risk assessment.

Anticipated Implementation Timeline: April 30, 2016

SPA will expand its risk-based approach to subrecipient monitoring to incorporate a formal risk
assessment prior to entering into a subrecipient agreement and tailor its monitoring process for
individual subrecipients based on the risk assessment. The risk assessment takes into account
several factors including the subrecipient's audit experience, the prior oversight and monitoring
the subrecipient has received, the nature and complexity of the proposed research project, and
fiscal maturity of the subrecipient. Where a subrecipient risk assessment reveals a high
potential for financial risk, a proposed risk mitigation strategy will be developed by SPA as
appropriate before proceeding with establishment of the subaward.

Anticipated Implementation Timeline: December 31, 2016

Contact:

Dawn Boatman Director, Sponsored Projects Administration dboatman@pdx.edu (503) 725-8306

Finding 2015-005 Cash Management, Reporting Significant Deficiency, Noncompliance

DEPARTMENT OF HEALTH AND HUMAN SERVICES Research and Development Cluster

Criteria:

As outlined in the *OMB A-133 Compliance Supplement*, when entities are funded on a reimbursement basis, program costs must be paid for by the entity before reimbursement is requested from the Federal Government. Entities submit reimbursement requests to federal agencies in order to be reimbursed for program costs. In addition, entities receiving such federal funds are required to submit various reports as specified by the awarding agency or in the award documentation.

Lastly, as discussed in OMB Circular A-133, Subpart C, those receiving federal funds are required to maintain internal control over Federal programs that provides reasonable assurance that the entity is managing federal awards in compliance with laws and regulations.

Condition:

During testing over cash management and reporting, we noted the following:

- Two instances where reimbursement requests totaling \$30,438.56 were drawn from incorrect projects as follows:
 - o CDFA 93.310, Trans-NIH Research Support
 - Draw amount \$377.18

- o CFDA 93.855, Allergy Immunology and Transplantation Research
 - Draw amount \$30,061.38
- One instance under CFDA 93.310, Trans-NIH Research Support, where an award was requested for reimbursement of \$38,367.15 but the general ledger support for expenditures totaled \$34,296.27. Per discussion management, management was attempting to correct a draw from a previous period, which was originally made from the incorrect project.
- One instance of ten financial reports tested in which the amounts reported to the federal government differed from the University's general ledger system.
 - One grant, CFDA 93.310, Trans-NIH Research, had \$72,124 more in expenditures recorded in the general ledger system than were reported to the federal agency. This amount was transposed with another grant, which had \$72,124 more in expenditures reported to the federal agency than were recorded in the general ledger system.

These errors were most likely caused from the draw down errors noted above.

• On all of the grants tested, we noted no evidence of review (or other type of control) over cash draws or reporting. While cash draws were reconciled monthly, this control appeared to be ineffective as there were errors noted during testing as described above.

Context:

Of the ten grant reports tested, one grant was noted as having errors as noted above. Of the 40 cash draws tested, two were noted as having errors as noted above. The draw error was related to a change in process for how the University drew funds from pooled to project based.

Cause:

While the University did have a process in place to draw down funds and report financial data to the federal awarding agencies, we found that there were not adequate controls in place to ensure reports and cash reimbursement requests were submitted timely and/or accurately.

Effect:

The University was not in compliance with reporting and cash management requirements.

Questioned Costs:

Draws were requested from the incorrect projects for the following expenses:

- CDFA 93.310, Trans-NIH Research Support
 - o Draw amount \$377.18
- CFDA 93.855, Allergy Immunology and Transplantation Research
 - o Draw amount \$30,061.38

Draw exceeded general ledger detail for CFDA 93.310, Trans-NIH Research Support, by \$4,071 as reported above.

Recommendation:

We recommend that the University implement a formal review control to ensure that they are properly submitting required reports (including reimbursement requests) timely and accurately. This review process should be performed by someone separate from the preparer and should include an audit trail to verify the control is occurring, as it should.

Views of responsible officials and planned corrective actions:

Response: Portland State University (PSU) generally concurs with this finding. We stipulate that there was not a two-step preparation and verification process in place for all letter of credit draws during FY2015. The amounts for the draws are based on expenditures recorded in PSU's Financial Information System (FIS) and are generated directly from pre-established events and billing process within the FIS that captures unbilled expenses for individual awards associated with PSU's letter of credit account(s) for individual sponsors. Amounts from the output of the billing process are entered into online systems designated by the federal sponsor. Most federal agency systems, including the PMS system used to draw funds for US Department of Health and Human Services awards, do not provide for a two-step verification process within the system itself to allow for review of the data entered prior to submission. Because of these system limitations, we cannot uniformly double check the draw amounts typed into the system prior to submission. In these cases, we must rely on accurate transfer of information from PSU records to sponsor systems in conjunction with post draw reconciliations. The errors noted in the audit were the result of entry errors of amounts from the billing system into the sponsor system. Some of the errors were the result of NIH's transition from pooled draw accounts to subaccounts in the Payment Management System (PMS). They were identified by PSU prior to the audit as part of a post audit review of the draw documentation. SPA recognized the frequency of the errors indicated the need for stronger controls outside of the sponsor systems and implemented a more robust system for review of billing output and reconciliation documentation by a second individual prior to entry of the figures in the agency systems.

Corrective Actions:

 SPA added a step to the letter of credit draw process that provides for more detailed documentation of the billing output analysis and regular reviews of the documentation in support of draw amounts. The FIS billing process output and reconciliation documentation are reviewed by a second individual prior to entry of the figures in the agency systems.

Status: Implemented February 2016

• SPA updated the reconciliation process for draws from DHHS awards to add a step that compares PMS account and subaccount numbers and amounts from PMS system to PSU's financial system records.

Status: Implemented September 2015

• SPA updated its award setup procedure to add the PMS Subaccount number to the Banner Grant Maintenance Form to clarify the relationship of PMS Subaccount number to the PSU Banner Grant Code.

Status: Implemented August 2015

• The FIS billing output report was revised to display PMS Subaccount numbers along with the PSU Grant Codes and expenditure amounts.

Status: Implemented August 2015

Contact:

Dawn Boatman Director, Sponsored Projects Administration dboatman@pdx.edu (503) 725-8306

Finding 2015-006 Activities Allowed or Unallowed Significant Deficiency, Noncompliance

DEPARTMENT OF EDUCATION TRIO Cluster

Criteria:

In accordance with Circular A -21, *Cost Principles for Educational Institutions*, costs of entertainment, including amusement, diversion, and social activities and any costs directly associated with such costs are unallowable. In addition, as discussed in OMB Circular A-133, Subpart C, those receiving federal funds are required to maintain internal control over Federal programs that provides reasonable assurance that the entity is managing federal awards in compliance with laws and regulations.

Condition:

During testing, we noted instances of charges to the grants which appeared to be for entertainment costs.

Context:

We noted 19 expenditures made on behalf of program participants that were for costs related to entertainment activities. Of the 19 disbursement, 4 were for 84.044 - Talent Search and 15 were for 84.047 - Upward Bound.

Cause:

The University did not have adequate controls in place to ensure compliance over federal awards.

Effect:

The University incurred costs that were not allowable under the program.

Questioned Costs:

\$5,853.41 for the Upward Bound CFDA 84.047 program and \$639.00 for the Talent Search CFDA 84.044 program.

Recommendation:

We recommend that the University reevaluate their control environment over the TRIO Cluster and the activities funded by this grant to ensure expenditures made from grant funds are for allowable costs.

Views of responsible officials and planned corrective actions:

Response: Portland State University (PSU) partially agrees with this finding. Given the purpose and specific objectives of TRIO, funding for the Upward Bound and Talent Search programs PSU has historically considered charges that may appear as entertainment costs as allowable charges to these programs as an exception to the provisions for selected items of cost specified in OMB Circular A-21.

The majority of the expenses have specific, documented educational or cultural purpose directly related to the objectives of the program. Other costs are for activities that functioned as participant incentives and rewards for attendance required educational activities such as workshops or summer classes. The approved project proposal and budget clearly describes and requests funding for cultural/recreational activities to expose the students to new experiences, help improve their social and communication skills and serve as incentives for participation in all aspects of the program.

Because the auditors alerted us that the US Department of Education Inspector General issued an TRIO program audit report that determined that costs of activities that do not have a direct instructional, college or career purpose do not meet the requirements for allowable costs under 34 C.F.R. § 645.40 and 34 C.F.R. § 643.30, PSU will discontinue charging these types of activities if their sole purpose is as a participant incentive.

Corrective Actions:

• PSU TRIO programs will discontinue programming recreational activities that do not have a direct instructional, college, or career purpose.

Status: Implemented March 30, 2016

• When requesting activity approval, TRIO staff will be required to submit detailed agendas outlining the purpose of every workshop or field trip, including the instructional, college, or career component.

Status: Implemented March 30, 2016

Contact:

Dawn Boatman Director, Sponsored Projects Administration dboatman@pdx.edu (503) 725-8306

Finding 2015-007 Cash Management Significant Deficiency

DEPARTMENT OF EDUCATION

TRIO Cluster

Criteria:

As discussed in OMB Circular A-133, Subpart C, those receiving federal funds are required to maintain internal control over Federal programs that provides reasonable assurance that the entity is managing federal awards in compliance with laws and regulations.

Condition:

During our testing, we noted that the University was not able to provide evidence of controls over compliance related to cash draws.

Context:

We tested two of the four draws occurring during the fiscal year. While we were not able to observe evidence of review controls, we noted no errors in the reimbursement requests submitted.

Cause:

The University did not have adequate review processes in place to provide evidence of controls over compliance.

Effect:

Although no errors were noted in our testing, without proper controls in place, noncompliance could occur without being detected.

Questioned Costs:

None noted

Recommendation:

We recommend that the University ensure proper controls are in place over the cash reimbursement process. Such controls could include segregation of duties between the preparer and the reviewer. The review should include an audit trail and be performed by someone knowledgeable of the compliance requirements.

Views of responsible officials and planned corrective actions:

Response: Portland State University generally agrees with this finding. We stipulate that there was not a two-step preparation and verification process in place for all letter of credit draws during FY 2015 fiscal year. The amounts for the draws are based on expenditures recorded in PSU's FIS are generated directly from pre-established events and billing process within the FIS that captures unbilled expenses for awards associated with PSU's letter of credit account(s) for individual sponsors. Amounts from the output of the billing process are entered into online systems as designated by the federal sponsor. Most federal agency systems, including the G5 system used for drawing US Department of Education funds, do not provide for a two-step verification process within the system itself to allow for review of the data entered prior to submission. Because of these system limitations, we cannot uniformly double check the draw amounts typed into the system prior to submission. In these cases, we must rely on accurate transfer of information from PSU records to sponsor systems in conjunction with post draw reconciliations.

Corrective Actions:

 SPA added a step to the letter of credit draw process that provides for regular reviews of documentation in support of G5 draw amounts prior to submission of draw amounts. FIS billing process output and reconciliation documentation are reviewed by a second individual prior to entry of the figures in the agency systems.

Status: Implemented February 2016

 SPA updated the reconciliation process for each draw to add a step that compares US Department of Education award numbers and amounts from G5 system to PSU's financial system records.

Status: Implemented September 2015

Finding 2015-008 Eligibility Significant Deficiency, Noncompliance

DEPARTMENT OF HEALTH AND HUMAN SERVICES passed through the OREGON DEPARTMENT OF EDUCATION

CCDF Cluster

Criteria:

Applicants to the program receive funds based on the specific criteria for which they qualify. Qualification is based on a mix of hours, courses, and other professional requirements determined by the State of Oregon (the State). In order for an applicant to be eligible, they must work at least 20 hours a week with children under the age of 13. Entities receiving federal funds are required to have controls in place to ensure compliance.

Condition:

During testing, we noted that the University incorrectly awarded a participant for criteria they did not qualify for based on their mix of experience. We also noted six instances where a participant file did not indicate through supervisor signature or self-certification that they work 20 hours per week with children under the age of 13. It was further noted that while the University had a process to determine eligibility, there was no evidence of a control performed over the eligibility determination process (a review control, for example) to ensure the process was being performed in accordance with federal regulations.

Context:

We tested a total of 40 participants. Of the 40 tested, one person was noted as not being eligible. Further, we noted six participants who did not have a signed certification (supervisor or self-certification) of working 20 hours a week with children under the age of 13. Lastly, none of the participant files tested appeared to have a control performed over the eligibility determination process to ensure participants were, in fact, eligible.

Cause:

The University did not have adequate controls over the eligibility determination process to ensure the participants are correctly awarded.

Effect:

The University was not in compliance with eligibility requirements as it relates to the Child Care Development Fund.

Questioned Costs:

Total payments during the fiscal year to the participant deemed not eligible was \$100.

Recommendation:

We recommend that the University implement a review process to ensure all participants are eligible based upon the criteria of the grant. This review should be performed by someone familiar with the program that is separate from the preparer. Such review should be documented to demonstrate evidence of the control and should ensure proper certifications are obtained as evidence for those working 20 hours a week with children under the age of 13.

Views of responsible officials and planned corrective actions:

Response: PSU generally agrees with this finding. The Oregon Center for Child Development (OCCD) has a process in place to evaluate the eligibility of participants to receive an award of funds. Awards are based upon adherence to eligibility requirements in place at the time the participant submits an application for funding. OCCD confirms eligibility within 45 business days processing of the application. The participant eligibility requirements are reviewed annually in accordance with the Oregon Department of Education's Early Learning Division's oversight of CCDF funds. The responsible officials acknowledge an oversight was made in documenting the supervisor's certification of the eligibility requirements.

Corrective Action:

The Oregon Center for Child Development at PSU will implement the following changes to the current participant award payment process.

An additional review of the eligibility documentation will be inserted into OCCD's award approval
process. Participant eligibility forms will be routed to an initial reviewer on a weekly basis. The
reviewer will ensure the form and eligibility requirements are complete and document the review
using the established process. OCCD staff will perform a quarterly audit of 5% of randomly selected
eligibility documentation to verify eligibility requirements have been met.

Anticipated Implementation Date: July 2016

• OCCD will require recipients to sign an accountability statement on all forms attesting that their work meets the CCDF eligibility requirements

Anticipated Implementation Date: July 2016
