

# 3 Active Learning Tips

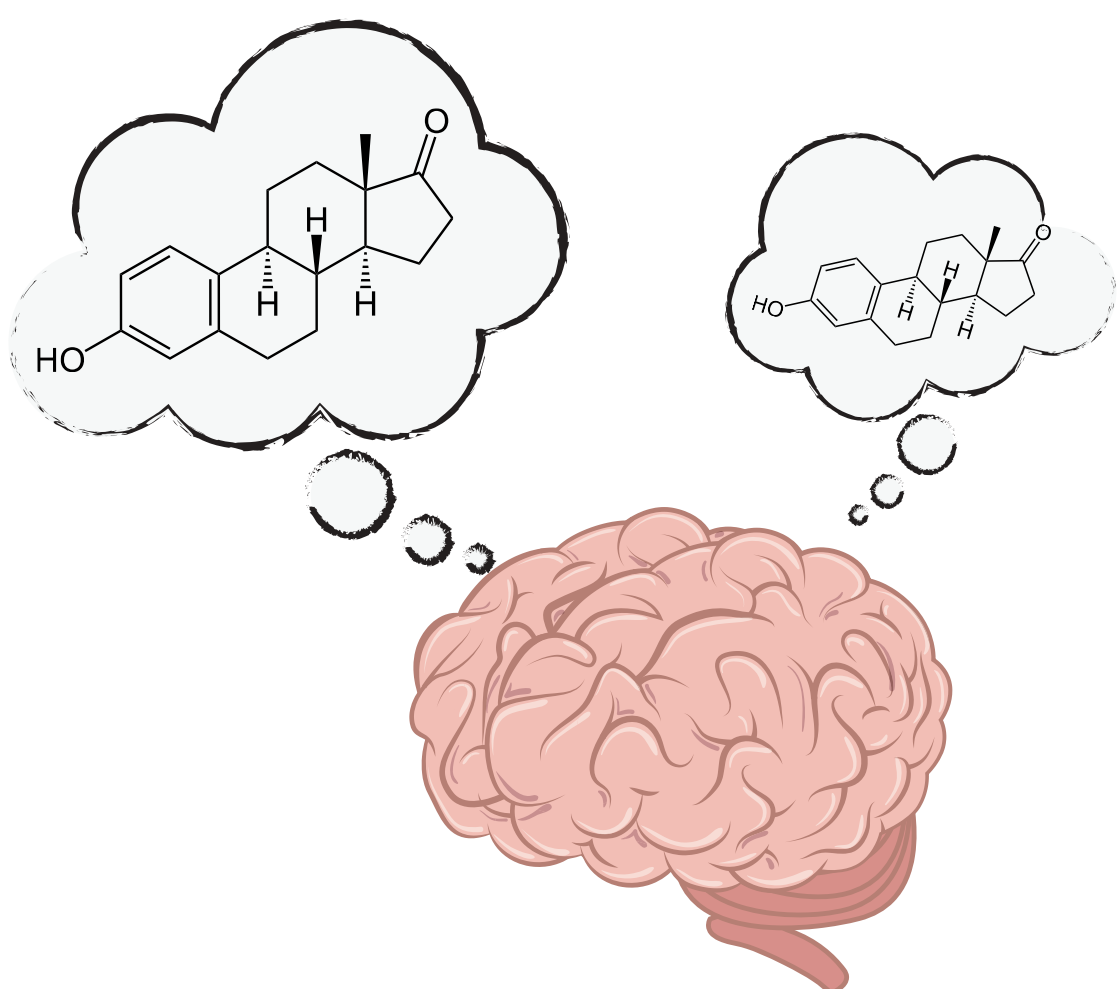

## Preview

For every hour in lecture, try to spend at least 30 minutes previewing the material ahead of time. This will aid in both comprehension and retention.

## Solidify

Time in class will help solidify the "big picture" that began to take shape when you previewed. Make sure to take advantage of this time to ask questions that clarify your understanding.

## Review

Review early and often. Try to finalize your notes at the end of each day so you don't get behind or overwhelmed. Look back on prior notes as the term progresses. The more often you review, the more likely it is that you will retain the information you have learned.
