OFFICE MARKET ANALYSIS

A. Synkai Harrison
Portland State University

Nationally the office sector experienced its “best performance in years” according to the National Real Estate Investor as employment in professional and business services sectors continues to grow. Demand in the office market is expect to remain strong in 2015 due to low inflation and the expansion of the US economy. Nationally the demand for office space is its strongest since 2006 with West Coast markets taking the lead. Once again technology firms continue to be a primary driver in the metro Portland office market as companies from San Francisco continue to seek Portland as their new home. Interest from institutional investors continues to grow due to low vacancy rates and increasing rents according to Jones Lang LaSalle, especially due to Portland being seen as a superior value compared to its closets major competitors.

VACANCY

The overage vacancy rate for the Portland market according to Kidder Mathews ended the fourth quarter at 8.2 percent compared to the previous quarter at 8.6 percent and 9.4 percent at the end of the fourth quarter of 2013. Colliers International reports an average total vacancy of 9.2 percent for the Portland market at the end of the fourth quarter down from 9.6 percent at the end of the third quarter and 10.4 percent at the end of the fourth quarter of 2013. CoStar reports the lowest vacancy rate for the Portland metro office market at 8.1 percent down from 8.5 percent at the end of the previous quarter of 2014. Jones Lang LaSalle reports a total vacancy for the Portland metro office market of 9.6 percent at the end of 2014.
compared to 11.1 percent at the end of 2013. According to Jones Lang LaSalle this is the lowest vacancy rate for the Portland’s office market in nine years.

Average vacancy rates for Class A projects was 9.6 percent at the end of the fourth quarter compared to 10.2 percent in the three previous quarters of 2014 and 10 percent in the end of the fourth quarter of 2013 according to CoStar.

CoStar reports that the vacancy rate has remained unchanged for Class B properties in the last two quarters at 8.5 percent. The vacancy rates for the first and second quarters was 9.5 percent and 8.8 percent respectively. Class C properties reported the lowest average vacancy rate, 5.9 percent, for all property types down from 6.6 percent at the end of the third quarter of this year.

As it seems with Portland’s office market overall, tech firms continue to drive demand in the Central Business District (CBD). Jones Lang LaSalle recently reported that 30 percent of leasing activity in 2014 can be attributed to high tech firms compared to 18 percent in 2007. Finance firms came in second with 22 percent and professional services at 12 percent.

Norris Beggs and Simpson (NBS) reports the most significant drop in vacancy for the Central City Portland, which includes Portland’s CBD, to 9.01 percent at the end of the fourth quarter of 2014 from 10.58 percent at the end of the third quarter. Portland’s Northwest area reported the lowest average vacancy rate at 7.77 percent compared to the CBD at 8.84 percent according to NBS. Total vacancy in the CBD according to Colliers International was 9.2 percent at the end of the fourth quarter of 2014. CoStar reports for the CBD, overall average vacancy has dropped to 9 percent at the end of the fourth quarter down slightly from 9.1 at the end of the third quarter of 2014. NBS reports an average vacancy rate for the suburban market of 13.52 percent.
