Carlos Mena (with Mellie Pullman, U. Sussex, UK, and Lucy McCarthy, U. Bristol, UK), published “Breaking bad: How can supply chain management better address illegal supply chains?” in *International Journal of Operations & Production Management*.

Abstract: This pathway paper offers research guidance for investigating illegal supply chains as they increasingly threaten societies, economies and ecosystems. There are implications for policy makers to consider incorporating supply chain expertise. The authors’ work is informed by the team’s previous and ongoing studies, research from fields such as criminology, investigative journalism and legal documents. Illegality occurs in many supply chains and consists in multiple forms. Certain sectors, supply chain innovations, longer supply chains, and heterogeneous regulations and enforcement exacerbate illegal activities. But illegal activity may be necessary for humanitarian, religious or nationalistic reasons. These areas are under explored by supply chain researchers. By encouraging supply chain academics to research in this area as well as form collaborative partnerships outside of the discipline, the authors hope to move the field forward in prevention as well as learning from illegal supply chains. Practitioners seek to prevent issues like counterfeiting with their products as well as fraud for economic and reputational reasons. Governments strive to minimise impacts on their economies and people, and both governments and NGOs attempt to minimise the negative social and environmental impacts. Policy makers need supply chain researchers to evaluate new laws to prevent enabling illegality in supply chains. As an under-explored area, the authors suggest pathways such as partnering with other disciplines, exploring why these supply chains occur, considering other data sources and methodologies to interdict illegality and learning from illegal supply chains to improve legal supply chains.

Presentations

Deveep Aikath and **Marta Stelmaszak Rosa** presented “They Work with Data and Do Some Science: How Identity Conflict Turns Data Professionals away from Data Science” at the International Conference on Information Systems, December 11, 2023. Hyderabad, India.

Just Got In!

Lihong Qian had her paper “From early curiosity to space wide web: Emergence of the small satellite innovation ecosystem” accepted for publication in *Research Policy*.

Marta Stelmaszak Rosa had her paper “Recognition in personal data: Data warping, recognition concessions, and social justice” accepted for publication in *MIS Quarterly*.

Joel Owens had his paper “How management disclosure and auditor disclosure affect auditor liability: The case of the going concern financial accounting standard” accepted for publication in *Auditing: A Journal of Practice & Theory*.

Carlos Mena had his paper “US federal government contracting for disaster management” accepted for publication in *Journal of Operations Management*.

Good to Know

Many reputable publishers place your published work behind paywalls, limiting access to readers in institutions who can afford subscriptions to these journals. You can increase the reach of your accepted articles by placing them into PDXScholar, the university’s open access repository. Visit [this link](#) to deposit your articles. The version you submit should be the version accepted by the journal, but not typeset by the journal.

Research Calendar

Date and Location	Event
January 19 12-1pm Bogue Boardroom	Brandon Reich (Assistant Professor of Marketing) Introduction to the Behavioral Research Lab @ Bogue Boardroom. Lunch will be served. Zoom: https://pdx.zoom.us/j/89427185569
February 5, 5pm	Application Deadline for Faculty Development Grants. Grants up to \$15,000 are available to support scholarly projects that have an impact on applicant career development, impact on the scholar’s field, and broader impact. See here for details.
February 21, 12-1pm Bogue Boardroom	Ji Woon (June) Ryu (Assistant Professor of Management) Research talk

March 4, 12-1pm Bogue Boardroom	Sambit Tripathi (Assistant Professor, Business, Technology, and Analytics) Research talk
April 12, 12-1pm Bogue Boardroom	Jingjing Chen (Assistant Professor of Finance) Research Talk
May 1, 12-1pm Dean's Conference Room	Frederik Vos (Assistant Professor, Logistics and Supply Chain Management) Research talk
June 12, 12-1pm Bogue Boardroom	Open Mic – All areas, everyone presents, 1 slide per person.
