**Portland State University  
Reconnaissance Level Survey  
Portland, Multnomah County, Oregon  
February 2014**

Survey and Report by:  
Aimee A. Finley, Historic Preservation Specialist, Applied Archaeological  
Research, Inc.

### **Statement of Project Objectives**

The Portland State University (PSU or University) selective Reconnaissance Level Survey is a selective inventory of historic resources located on the University campus that date to between 1893 and 1969. The survey is funded by the University and conducted in collaboration with the Oregon State Historic Preservation Office (SHPO). Three projects objectives were defined in consultation with PSU and the Oregon SHPO:

- To complete a selective reconnaissance-level historic resources survey for properties constructed before 1970 on the Portland State University campus.
- To prepare a survey report that provides Portland State University with baseline data for their ongoing planning related to the management and protection of their historic resources, including recommendations for additional studies regarding their historic properties, as appropriate.
- To contribute to the body of knowledge regarding historic resources on the Portland State University campus in downtown Portland.

### **Methodology**

The PSU selective Reconnaissance Level Survey focused on all buildings, structures, and significant landscape elements on the campus over 45 years of age. The period of significance is defined as 1893 (the construction date of the oldest building) to 1969 (the end of the historic period defined for this project). This report provides baseline information on the oldest campus buildings. As part of its ongoing planning process, PSU's goal is to continue its survey efforts and add newer buildings, structures and significant landscape elements to the inventory as needed.

At the reconnaissance survey level, assessment of the integrity of a resource and its potential eligibility for inclusion in the National Register of Historic Places (NRHP) is considered to be preliminary. At this level, integrity is weighted toward a resource's age (including the age of major alterations) and its external physical appearance. As outlined by SHPO, a resource's integrity is based on its age and the degree to which established architectural character-defining features remain. The assessments in this report are based primarily on those two factors and resources are ascribed one of six evaluation categories.

Resources categorized as Eligible/Significant (ES) are over 45 years old, retain their original physical materials and design elements, are of a notable architectural style or designed by a notable architect, or are known to be related to a significant event or person. Resources categorized as Eligible/Contributing (EC) are those that are over 45 years in age and retain original materials and design, but are not of a notable style, the work of a notable architect, or associated with an important event or person. Resources categorized as Not Eligible/Non-Contributing (NC) are over 45 years old, do not preserve their historic materials or style, and may have had incompatible alterations within the last 45 years. The remaining

three categories are reserved for resources that are not eligible because they are of insufficient age (NP), they could not be located (UN), or they have been demolished (XD).

The selective Reconnaissance Level Survey is focused on the core University campus in downtown Portland, as shown in Figure 1. It included background research and field investigations. Research was conducted concurrent with the field study in order to prepare the historical overview, to search for historical photographs of the survey area, to compile data on the identified resources, and to field-verify data provided to AAR by PSU. AAR consulted holdings at PSU, the Oregon SHPO, the Oregon Historical Society, the Multnomah Tax Assessors Office, and the Multnomah County Library. Additional research materials included historical maps produced by the General Land Office and the United States Geological Survey, Metsker Real Estate Atlas maps, and Sanborn Fire Insurance Maps.

Field data collection occurred between August and October 2013, and included a walking tour of the survey area. Each identified resource was visited and photographed. Summary data collection or field-verified during the field visit from the exterior of each resource included name, address, height, plan, siding, building materials, construction date, original function, and architectural style. The data was entered into the Oregon Historic Sites Database.

The survey followed the “Guidelines for Conducting Historic Resource Surveys in Oregon” revised February 2008 by the Oregon State Historic Preservation Office and complies with the Secretary of the Interior’s Standards for Preservation Planning.

### **Boundary Explanation and Justification**

The survey area, shown in Figure 2, corresponds to the defined PSU campus boundary and includes all assets owned by the University. General boundaries include Interstate 405 to the south, SW 13<sup>th</sup> Avenue to the west, SW Market to the north, and the buildings on both sides of SW 4<sup>th</sup> to the east. The city-owned South Park Blocks form a linear, north-south corridor through the center of campus.

The campus is irregular in shape. Because of the ad hoc nature of campus expansion in a developed urban environment, some non-University properties are located within the survey boundary. These are not included in the survey. West of the South Park Blocks, only one non-University building is located within the boundaries. To the east, the density of University buildings is more diffuse, particularly east of SW 5<sup>th</sup> Avenue.

### **Historical Overview**

#### Origins of the University

Portland State University was originally known as the Vanport Extension Center and was located in NW Portland. That institution was founded in 1946 to fill a presumed temporary need to educate returning veterans of World War Two. After a catastrophic flood in 1948, the Center struggled to find a new location and a more permanent status. In 1949, the Center finally found a home in downtown Portland, with the purchase of the Lincoln High School building. The school was renamed the Portland State College Extension Center in 1951, and became the four year, degree-granting Portland State College in 1955 (Dodds 2000:101). Coinciding with its elevated status, the first phase of campus expansion outside of the renamed Lincoln Hall also began in 1955. Portland State College existed from 1955 to 1969, when it transformed into its current incarnation as Portland State University.

## The Downtown Campus

Several factors have contributed to the development of the downtown PSU campus as it exists at the time of this survey. First, the campus was established in a previously developed urban setting. Several properties that predate its establishment have been incorporated into the campus and repurposed for educational uses. Second, demolition of existing properties cleared the way for early campus expansion (Sanders and Schauer 2009:80). Finally, the ongoing acquisition of modern, privately-developed properties allows for the expansion of the campus to meet PSU's current needs.

The underlying strategy in the 1950s was to segregate the overcrowded Jewish and Italian immigrant slums that grew during early 1900s and promote public and private reinvestment in the German Irish southern suburb to uptown Portland. The Fruit & Flower Mission, Lincoln High School and the Failing and Shattuck Normal Schools were all intended to assist the early immigrant populations in assimilation and citizenship (Abbott 1983; Mercer 1979). The 20 block area west of SW Broadway (previously 7<sup>th</sup> Avenue) was established as the Portland State University Urban Renewal Area in 1965. This cleared the way for HUD funding to purchase and consolidate the properties for early campus expansion (Oregonian July 9, 1966; Abbott 1983; PSU historic deed records). As a result the streets through the west half of the campus were vacated by the city of Portland in 1971, allowing the development of the campus. Finally, the ongoing acquisition of modern, privately-developed properties allows for the expansion of the campus to meet PSU's current needs.

The original downtown PSU campus consisted of one building, Lincoln Hall. The former high school was purchased from the city in 1949 (Sanders and Schauer 2009:23). It served as the sole campus building until 1955, when the elevation of the school to a four-year college kicked off a 14 year building program that lasted to 1969. During this period, 26 buildings were added to the campus, either built or purchased by PSU (Dodds 2000:101).

## Campus Expansion: 1955-1969

The first campus expansion occurred during the tenure of PSU's first President, John F. Cramer (1955 to 1959). In 1955, the five city blocks south of Lincoln Hall were acquired (Dodds 2000:101). The Shattuck Normal School building marked the southern end of this initial expansion. Much like Lincoln Hall, Shattuck Hall was retained and repurposed, while the blocks between the two were incrementally cleared for new development. From north to south, construction of Cramer Hall (originally State Hall), the Smith Memorial Student Center (originally the Student Center), and Neuberger Hall formed the original spine of the campus, lining the east side of the South Park Blocks. While all three buildings would eventually occupy full city blocks, these three buildings were planned from the beginning to be built in phases as funding became available (Dodds 2000:102). Cramer Hall, begun in 1955, was the first building built specifically for the campus. It was built in four quadrants. The first quadrants built were the northwest and the southeast. The original parts of the Smith Center and Neuberger Hall were built on the west halves of their respective city blocks.

Expansion continued during the tenure of President Branford Price Millar, from 1959 to 1968, and focused on the area west of the South Park Blocks (Sanders and Schauer 2009:42). The Foothill Freeway was proposed in the mid-1950s and announced in 1958. In 1960, the Foothill Freeway alignment was officially adopted by the Oregon Department of Transportation and initial field work began that year. In 1960, a PSU planning committee recommended a four-block campus expansion with boundaries defined as SW Montgomery Street on the north, SW Park Avenue on the east, SW Hall Street on the south, and SW 11<sup>th</sup> Avenue on the west (Dodds 2000:103). A formal campus expansion plan, prepared by the Skidmore, Owings, and Merrill architectural firm, was adopted in 1961 with proposed new boundaries: Interstate 405 to south and west, SW Market Street to north, and SW 6<sup>th</sup> Avenue to the east (Dodds

2000:104-105). During this period, buildings including three private residences located in the campus expansion area were purchased.

By the mid-1960s, a new campus plan was devised. In 1965, a 48-acre area was set aside for the continued development of PSU (Abbott 1983:213). In 1966, the new plan, prepared by the Campbell, Michael, Yost firm and approved by the state legislature, was adopted (Sanders and Schauer 2009:62). The plan included a landscape of full block six-story buildings connected by a network of pedestrian sky bridges. While the campus boundaries were similar, with the exception of a western boundary at SW 13<sup>th</sup> Avenue, the new plan addressed changes that could occur as part of an urban renewal program (Dodds 2000:105). The University could redevelop or repurpose any buildings in this area, as it saw fit. Removal of all the existing buildings in the urban renewal area was approved and planned to be cleared. Student activists occupied the vacant housing buildings in the urban renewal area and petitioned to form Portland Student Services to manage approximately a dozen apartment buildings for student housing. The main office was established in the Martha Washington Apartments (Sanders and Schauer 2009:80). The first properties developed under the plan were the Physical Education Building, Science Building I, Parking Structure One, Phase 1 of the Branford Price Millar Library and multiple sky bridges that establish a recurring archetype of bridges and gateways. By 1969, when the college became a university, its footprint at the south end of downtown Portland was firmly in place.

### Campus Composition

Due to factors related to its urban, downtown location, the growth of the PSU campus has followed two trajectories. Beginning in 1955 and continuing today, PSU has constructed new buildings as needed. These typically exhibit modern architectural forms and styles common to developments since the mid-20<sup>th</sup> century. However, because PSU was established in a developed urban context, the University has also supplemented its campus holdings by acquiring and repurposing existing buildings. Early on, the repurposed buildings predated the establishment of the downtown campus and were added during the major expansions of the 1950s and 1960s. These are most commonly found west of the South Park Blocks and were designed in an array of late-19<sup>th</sup>/early-20<sup>th</sup> century styles. These include former residential and educational properties. In recent years, continued expansion of the campus to the east has resulted in PSU acquiring privately developed modern-period office buildings. These buildings more closely resemble the PSU-built properties than the existing buildings acquired earlier.

The parts of the campus west of and lining the Park Blocks have a fairly even mix of the two types of buildings (old repurposed residential and mid-century institutional), while the parts of the campus east of Broadway are more uniformly modern in nature.

### **Data Summary**

The Portland State University selective Reconnaissance Level Survey identified 38 resources that fit the survey criteria, including 34 buildings, three structures (pedestrian bridges), and one object (the Oregon Landmark Sculpture). This number represents approximately half of all current PSU properties.

The 38 resources include 31 contributing properties and seven non-contributing properties. When the Oregon SHPO eligibility categories are applied, most resources included in the survey area are classified as EC (n=26). The majority of campus buildings are intact examples of their styles which have not undergone major and incompatible exterior alterations. However, some of these properties are examples of common architectural styles found throughout the city and are not architecturally noteworthy. The remaining five contributing properties are classified as ES. Of these, two have been individually listed

on the NRHP, two have been determined eligible for listing, and one is a local landmark. The seven non-contributing properties are classified as NC, due to major recent exterior alterations.

Construction dates of surveyed resources span the period of significance defined for this project: 1893 to 1969. The survey area includes 14 buildings built before 1950 and already in place when the downtown campus was established. These represent developments within the footprint of the campus that were retained and repurposed by PSU. The campus includes 21 resources built between 1950 and 1969. Most of these were built by the University. The remaining seven include mid-century private developments that have since been purchased by PSU. The final three resources were constructed after 1969, but were added to the SHPO database as part of the survey of Portland's modern period resources, and so are included here as well.

Original uses of the PSU properties are generally compatible with a functioning urban university campus. Twelve of the buildings are associated with education, while 12 domestic properties are used for housing, and six (parking garages and pedestrian bridges) are associated with the transportation of the student body. One landscape feature is a piece of public art designed for the University. The remaining seven properties were built for other uses (five for commerce, one for agriculture, and one of unknown function) but have been adapted to educational uses after being purchased by the University. The architectural styles of the resources are closely aligned with their original uses. Thirteen properties are a mix of Queen Anne (n=3), Georgian Revival (n=3), and other period revival styles (n=7). These include the residential properties and the elementary school buildings (Lincoln Hall and Shattuck Hall). One, the public art sculpture, is classified as other. The remaining 25 resources are classified as expressing Modern Period styles, including International (n=11), Utilitarian (n=7), Brutalism (n=3), and one each of the modern commercial, mansard, and post-modern styles. The surveyed resources are most commonly constructed of brick (n=20) or concrete (n=12). The remaining resources include three of wood, and one each of metal, stone, and stucco.

## **Recommendations**

Based on the results of this selective reconnaissance level study, the following recommendations are made. Further study is needed for properties designated as EC resources in this reconnaissance study. Through intensive study, more definitive classifications of resource integrity can be advanced. For example, upon closer inspection and when considered within additional historical and architectural contexts, some properties of common architectural style may be reclassified as NC.

Due to its mixture of architectural styles, its diffuse eastern boundary, and its ad hoc history of incorporating buildings constructed for other purposes, it is unlikely that the Portland State University campus as a whole is potentially eligible for listing as a historic district.

Finally, periodic updates to this survey would ensure that the eligibility of resources constructed after 1970 can be addressed and that eligibility evaluations for all properties can be refined. Approximately half of all PSU properties post-date 1970 and were not included in this selective survey.
