Visitor Information

Welcome to the *infra*Structure Testing and Applied Research (iSTAR) Laboratory. This information is being given to you because we are genuinely concerned about the health and safety of everyone here.

- Mandatory PPE (Personal Protective Equipment; hard hat, safety glasses, closed toed shoes) must be worn except under normal hazard level and in the designated safety corridor shown on the map below.
- Refrain from touching or using any equipment, machinery or test specimens in the laboratory.
- Do not distract people using equipment or machinery.
- Remain with your guide and follow his/her instructions.
- Unless permission is granted please refrain from stepping or climbing on objects that might be on the ground around the laboratory.

Hazards in the laboratory include:

- **Overhead crane**
stay well clear of the items being lifted
- **Moving Machinery**
stay well clear of forklift and floor jacks
- **Hydraulic Equipment**
stay well clear of hoses and actuators
- **Slips, Trips and Falls**
watch your step as can be many trip hazards
- **Fire or Emergency:**
please follow instructions from your guide

Student/Staff Training Overview

Safety requirements, including PPE and training, are outlined in the mandatory lab orientation.

Student/Staff	Completed Training		
	Crane	Forklift	Machine Shop
