InSpec Group is a Portland-based engineering and construction firm that helps customers design, build and operate complex industrial facilities throughout North America and overseas. Founded by Taro Toyoda and Doug Smith -- two businessmen who bridge the business cultures of the United States and Japan -- InSpec will be celebrating its 10th anniversary in 2011. The company has been fortunate to have designed and built facilities for some of Japan’s leading companies across a broad range of industries including food processing, advanced materials, chemicals and clean technology.
