- Already have a master’s in counseling? 33 credits to a preliminary school counselor license
- Two tracks available based on your experience

The School Counseling program prepares professional school counselors to work in P-12 public and private schools. Our program prepares school counselors to be change agents and advocates within the school environment promoting equity for all students to grow personally, socially, academically, and to achieve their life-long educational and career goals.

We focus on preparing school counselors who are skilled in providing developmentally and culturally responsive prevention and intervention for students and families within schools, who work effectively with individuals and complex systems, and who collaborate and partner with other professionals and their communities to promote the growth and well-being of students.
