Northwest Energy Policy and the Columbia River
(Energy Resources Policy and Administration)

Join a distinguished team of faculty members and guest speakers as a participant in PSU’s biennial spring seminar on Northwest Energy Policy and the Columbia River. This seminar is designed to serve two key audiences:

» Graduate students from a wide range of disciplines at PSU and other local universities who are interested in understanding how and why our region’s energy policy has reached its current state, what our region’s current energy policy issues are and why they are important.

» Mid-career professionals already working in the energy field, and others interested in advancing their careers or just learning more about this fascinating subject.

For many years, the Bonneville Power Administration, several local utilities, the Energy Trust of Oregon, Northwest Energy Efficiency Alliance, and other key energy companies and agencies have encouraged and supported those employees they have identified as possible future leaders to enroll in this course. This participant mix leads to lively and informative class discussions. In fact, by participating in this class, employers have identified and recruited excellent future employees, and graduate students have found excellent jobs in this fascinating field. Many of the Northwest’s most respected energy leaders enrolled in this course earlier in their careers. Many have generously returned as guest speakers to help us prepare the next generation of energy leaders.

» Thursday evenings, April 3 - June 12, 2014, 6:30 pm – 9:40 pm
» Includes an optional session on May 8, 2:30-5:15 pm
» Plus two optional field trips
» Urban Center, Distance Learning Center, Room 204, (506 SW Mill) PSU
» Lead Faculty: Jeff Hammarlund, plus many guest speakers.

Visit the course website for information on the policy topics we will explore, links to registration, a previous course syllabus, and other information:  www.pdx.edu/cps/nwenergy

Registration Information
This course is available for 3 graduate credits or as a non-credit professional development seminar.

» Tuition for credit is based on the standard tuition rate for a 3-credit graduate course. Register online at www.pdx.edu/registration/register using CRN 64706.

» Fee for non-credit professional development: $900. Register online at www.pdx.edu/cps/nwenergy.

» Seminar is limited to 35 participants and often fills up, so we recommend registering early.
