Where They Are Now: Spotlight on Danielle Swartz-Koufman

Professor Chris Borgmeier, Ph.D., whose research interests focus on School-Wide Positive Behavior Supports, recently presented his insights on the topic at a conference in Hawaii. Borgmeier's work has been featured in several academic journals and has been influential in the field of education. His latest publication, "Innovations in School-Wide Positive Behavior Supports," has been well-received by educators and researchers alike.

Professor Chris Borgmeier Presents on International Stage

Doctoral student and assistant professor in the College of Education, Danielle Swartz-Koufman, was recently invited to present her research on incorporating anti-bias in early childhood education during a podcast last week. Swartz-Koufman's work has been recognized for its innovative approach to integrating anti-bias into early childhood education, and her presentation was widely praised by listeners.

A presentation of academic research to improve reading and language outcomes for English learners is needed, and one that has been successfully implemented is the book "Supporting Language Learners." This book provides practical strategies for educators to improve reading and language outcomes for English learners, and it has been widely adopted by schools across the country.

To help English learners, Julie Esparza Brown published her first book in May 2019, "Supporting Language Learners." The book is based on her research and provides practical strategies for educators to support English learners in the classroom. It has been well-received by educators and has been adopted by many schools.

Mobility Matters Will Spotlight Youth Leadership

Mobility Matters, a conference that focuses on transportation and mobility issues, will feature a youth focus in its partnerships and programs. This shift in focus reflects the growing recognition of the importance of engaging young people in transportation and mobility issues.

In January, a group of Portland State University (PSU) students of color hosted a celebration for Portland Teachers Program (PTP) graduates. The event always seeks to highlight advances in technology and new approaches for transportation, and this year's event was no exception.

However, this year's event was marked by a controversy over the theme, "Justice." Some organizers faced criticism for choosing a theme that was seen as focusing too much on race and pedagogy.

But this time, lead organizer Amy Parker, an assistant professor in the PSU College of Education, was determined to make sure that the event was inclusive and welcoming to all.

"It's important to remember that our transportation systems are for everyone," Parker said. "We need to ensure that all voices are heard and that the event is a space for learning and growth."
