GSE Assessment Fair 2015

Marital Couple and Family Therapy
Question: It is very important that students learn how to conceptualize their client cases. How can we help them be more effective in case conceptualization?
Collect Data

Data Collection Tools/Methods:

Students already are showing high quality case conceptualization skills. Instructor will continue to focus on goals and strategies in particular. Rubric will be used to assess growth. Internship assessments will be used to corroborate growth as well.
Data:
Coun 577’s rubric shows Goals: 74% rated proficient or exemplary in 2013 which improved to 85% in those two categories in 2014. The exemplary alone moved from 13% to 45%.
Strategies: Percentages in both categories remained the same at 90% but the exemplary increased from 61% to 65%.

Internship: “Develops appropriate goals as a result of conceptualization” showed an increase, after Coun 577 was completed. Total 71%, up from 58% the previous quarter.
“Understands interplay between strategies and goals” moved from 14% to 37% in the Advanced category

Analysis:
It appears that the focus on goals and strategies in Coun 577 increased competency in students.
Action steps:

Continue to focus on elements of goals and strategies.

Take Action
