GSE Assessment Fair 2012

Program to Prepare Teachers of Visually Impaired Learners

Program Coordinator: Jim Bickford
Ask a Question

Question: Do students completing an on-line program achieve the necessary competencies and standards for licensure?
Collect Data

Data Collection Tools/Methods: Survey distributed to all cooperating teachers of student interns listing the CEC approved competencies for teachers of students with visual impairments.
Data: Mean scores on each competency ranged from 2.9 to 3.7 based on a 4.0 scale

Analysis/Conclusions: Students have achieved foundational competencies; but some skills and knowledge are less obvious than others.
Action steps: Reorganize class sequence, so that weaker areas are taught face to face. Rewrite and revise curriculum to better focus on skills in the field.
