Expand your leadership skills in educational administration

The Continuing/Professional Administrator License (CAL) program is designed for current administrators wishing to begin service as a district-level administrator or improve their effectiveness as a continuing administrator. CAL students increase their ability to collaborate with teachers, parents, and members of the school district community to design educational programs that foster successful teaching and learning in a climate where social justice prevails.

The CAL curriculum emphasizes district-level leadership for equity and prepares school-level and district-level administrators to have a well-informed understanding of their schools and the broader concerns of their school districts. To be eligible for the CAL program, you must currently hold an Initial/Preliminary/Principal or Reciprocal Administrator license. CAL courses can be completed in any order, during any term, and at your own pace.
