

REVIEW PSU'S WILDFIRE SMOKE PLAN!

• Wildfire Smoke Prevention •

Smoke from wildfires contains harmful gases and particles that can present significant health hazards including burning eyes, a runny nose, and aggravated chronic conditions. Everyone should avoid breathing smoke.

Discuss control measures with your supervisor, including rescheduling outdoor tasks, changing work schedules, working indoors, and availability of N95 respirators.

TIPS

- Review workplace procedures annually
- Use an N95 mask, not KN95 or others
- Communicate often with supervisors

KEEP AN EYE ON THE AIR QUALITY INDEX!

EPA's AirNow app provides a simple way to quickly check current and forecast air quality information for any location, including tips and info for planning daily activities and protecting your health.

TIPS

- Check PM2.5 and AQI levels before work
- Plan your work tasks around the forecast
- Learn your personal risk factors
