HIGH RISE FIRE SAFETY

In Case of Fire...

**DO:**
- Keep calm
- Report the fire by calling 9-1-1
- Advise other employees
- Use nearest stairwell
- Close doors and windows
- Keep low, under the smoke
- Go to assigned assembly point
- Direct firefighters to emergency

**DON’T:**
- Panic
- Assume the fire has been reported
- Try to quickly gather belongings
- Use Elevator
- Break windows
- Run through smoke-filled areas
- Become a “spectator”
- Go back into the building!

1. Store a flashlight and a whistle at your workstation.
2. Know your emergency safety procedures and evacuation plans.
3. Know what is expected of you in an emergency.
4. Locate all primary and secondary exits. Practice walking through these evacuation routes...
5. Identify the locations of fire safety equipment, alarm pull stations, extinguishers and emergency exits.
6. Have a 72-hr emergency kit at your workstation.
