FACILITIES & PLANNING COST ESTIMATES

Sometimes it’s necessary to know what a job is likely to cost before work begins. Facilities & Planning can provide you with up to two hours of estimating time at no initial cost. If more than two hours are needed to create an estimate, you will be asked to provide an index code.

Once an estimate has been provided, you must decide whether to approve it. If an estimate is approved and work proceeds, the estimating time will be included in the total cost of the work billed to your department. If an estimate is not approved, meaning that work does not proceed, then there is no charge to your department for estimating time under two hours.
