LINCOLN HALL
BROADWAY ENTRANCE PROJECT

The newly renovated Lincoln Hall is a beautiful gem set in the Portland State University (PSU) crown of historic buildings in the Park Blocks. Yet as stunning as the change was due to the renovation, PSU has more in store for Lincoln Hall!

Lincoln Hall is adding a new entrance on SW Broadway. Construction will begin very soon (late spring 2011), with completion scheduled for late summer 2011. The new entry will be a single story glass entry on the northeast corner of the building. The new entrance will provide direct ADA access to the existing elevator lobby, and a street level lobby for Patrons, students and staff.

Additionally, as part of PSU’s ongoing quest for sustainability on the energy front, an installation of photovoltaic panels will begin late spring 2011, with completion scheduled for late summer 2011. This array of photovoltaic panels will be placed on the Lincoln Hall roof. These panels will provide 37 Kw hours per year of electricity for the building.

The cost for these projects is $950,000.

A great team was assembled to manage this project. Below is a list of some of the most significant contributors to its success:

PSU Assistant Director for Capital Project Management: Ron Blaj
PSU Project Manager: Joanna Evenson, JJ Henri
PSU Project Support:
    Facilities Operations, Systems Crew
    Facilities Operations, Electrical Crew
    Facilities Lockshop
Design Engineer: BOORA
Construction Company: Howard S. Wright Construction
Commissioning Agent: EESI
