Architecture of Eurasian Cities
A Family Geography Night Activity

Asia is a land of contrasts. Its architecture certainly follows this pattern. This activity is a simple matching game. The object is to match the photo(s) with the description of the city. There are two photos for each of the cities.

Good luck!
City 1 – St. Petersburg, Russia. It is a very flat city with many canals. It also has wide avenues and huge French-inspired museums.

Picture _____     ____

City 2 – Moscow, Russia. This huge city is the capital of Russia. It is both the military and religious center of Russia.

Picture _____     ____

City 3 – Irkutsk, Russia. Irkutsk is near Lake Baikal in central Siberia. It is found in the middle of great forests, and because of that, many buildings are constructed from wood.

Picture _____     ____

City 4 – Ulanbator, Mongolia. UB is a rapidly-growing city changing from traditional, nomadic living structures to ultra-modern skyscrapers.

Picture _____     ____

City 5 – Beijing, China. Beijing is an enormous city that is as modern and efficient as any western city. However, it does honor its history by showcasing both the Forbidden City and the Great Wall.

Picture _____     ____
