The Age of Oregon’s Population

What is a Population Pyramid?

A population pyramid divides a population by gender (male or female) and by age (from youngest at the base to oldest at the peaks). Each bar of the pyramid represents a percentage of the population.

This pyramid shows Oregon’s 2002 population, and each bar represents five years of the population.

Another way to show a state’s population is with a choropleth map. The two maps at the right show where the 10-14 year olds and the 55-59 year olds live in Oregon.
