Health Professional Family

Overview

Positions in this job family** provide students with specific care for which the professionals are licensed. Incumbents in these positions provide direct health, psychological, psychotherapeutic and related services to individual students and groups of students. Professionals in these positions also provide instructional and outreach programs that support student learning and healthy life styles.

Qualifications

Academic degree relevant to the specific professional practices (e.g. M.D., M.S.W., Ph.D., M.A., M.S.) and license to practice. For all positions, prior professional experience is preferred. For Physicians, Board certification is preferred.

Examples of Duties Performed

- Provides health and/or psychotherapeutic services to students.
- Triages students needs and appropriately refers to outside care providers
- Supervises residents and graduate student interns
- Provides outreach programs and services

Representative Job Titles for Health Professional Family

- Clinical Social Worker
- Physician
- Psychologist

**Please be aware the definitions of family levels are generic descriptors for a broad range of job duties and responsibilities found within each family of jobs. They are not intended to be used as determining factors. The position analysis ultimately determines the level and family of each Academic Professional position. The placement and analysis is based on the position, not the person.
