

MEDICAID BENEFICIARIES

Medicaid provides access to community-based care (CBC) for low-income adults and people with disabilities. CBC includes assisted living facilities, residential care facilities, memory care communities, and adult foster homes.

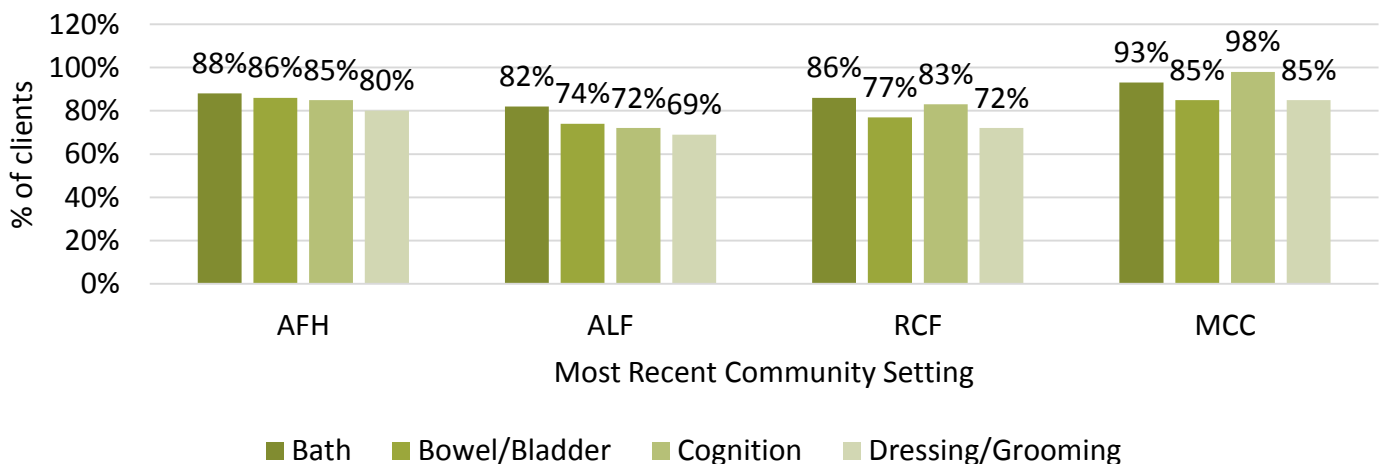

There were 14,809 Medicaid clients age 18 and over whose last residence in FY 2013-14 was a CBC setting.

Client Demographics

Assistance with Activities of Daily Living (ADLs)

Assistance or Full Assistance with ADLs

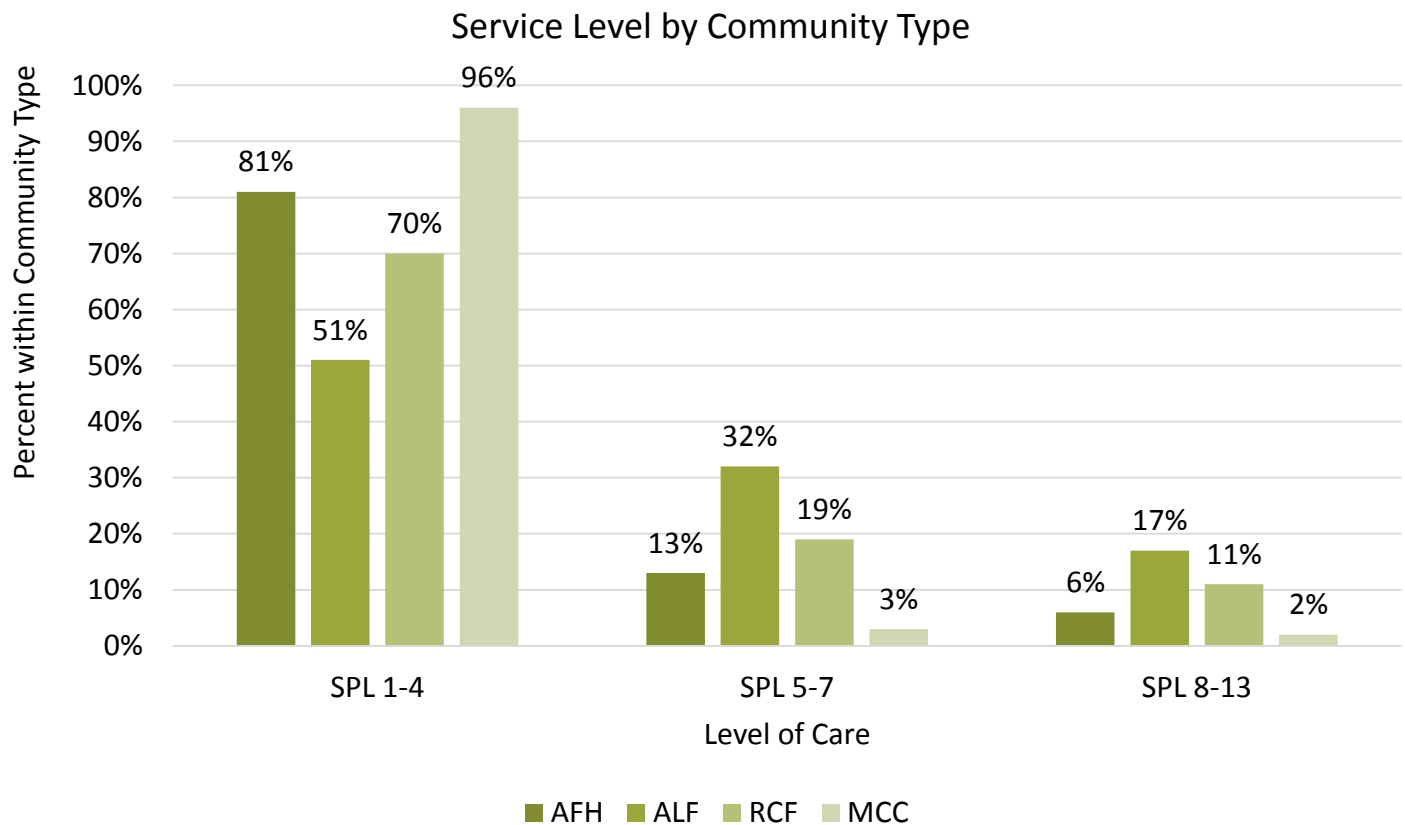

Health Service Use*

Hospital Admissions	16% AFH	13% MCC	11% ALF	7% RCF
Emergency Department	45% RCF	44% AFH	42% ALF	35% MCC
Hospice Services	41% AFH	34% ALF	18% MCC	7% RCF

*This information is for individuals between the ages of 18 and 89 only.

Medicaid clients who were 90 years of age or older were admitted to the hospital at a lower rate (**5%**) than younger clients and about **31%** had at least one emergency department visit during the past year.

This flyer is based on an analysis of data provided by DHS on Medicaid beneficiaries served by CBC settings. The data was from fiscal year 2013-14 on 12,007 APD Medicaid beneficiaries whose last residence was an assisted living facility (ALF), a residential care facility (RCF), a memory care community (MCC), or an adult foster home (AFH).
