CH 199-PH 199: Preparation for General Chemistry and Physics

Shankar B. Rananavare

This course covers a review of basic concepts for students with a weak background in high School math and/or anyone who has had problems passing General Chemistry or General Physics. Topics include, elementary mathematical concepts, vectors, dimensional analysis as well as other topics of importance.

- Books:
  - Mathematics Made Simple: Sperling & Stuart (Required).
  - The Success Manual for Chemistry: Kean and Middlecamp, Optional
  - Mathematical Methods for Introductory physics with Calculus: R. C. Davidson, Optional
