 - a. Do you think UPSOC should be, in part or in full, the recommended vehicle for carrying out the implementation and assessment of the work the RCSC has started moving forward? If so, how might that look? If not, what do you all think is the right way to address this issue?
 - i. Should UPSOC be the committee that serves to process institutional issues around safety and security (policy analysis and otherwise) for the future? (How is this different from what we do now?)
 - ii. Would UPSOC be willing to change its charter to reflect this?
