Manuel and Kimberly will be facilitating a discussion with us and will be asking us the following questions:

The basic questions we will have around these two items are:

1. What are your thoughts on any of these recommendations? Do you have any suggestions for additions, modifications, etc...
2. How do you see any of these recommendations connecting with or impacting your work as UPSOC?
3. Are any of these recommendations already in motion in some other venue?
4. Do you think UPSOC should be, in part or in full, the recommended vehicle for carrying out the implementation and assessment of the work the RCSC has started moving forward? If so, how might that look? If not, what do you all think is the right way to address this issue?
