

# CAMPUS REC

## Kayak Pool Session Rules

*Kayak Pool Session monitors are able to provide instruction to their ability, but are not certified kayak instructors. Please check in with each monitor about your learning goals.*

1. Boaters must check in with Member Services (2<sup>nd</sup> floor of the ASRC) when coming to pool sessions.
  - *For Kayak Pool Sessions only, non-members are not required to have member sponsor; however, they need to pay the \$7 guest fee and sign a waiver.*
2. All boaters must take a shower before getting into the pool or spa.
3. Please make sure that your boat is free of debris and dirt before bringing it to Campus Rec. All personal boats must be thoroughly rinsed (with the float bag out) on the pool deck prior to being used.
  - *If bringing your own boat, place it near the pool's emergency exit (top of the stairs, near the elevator) and check in with Member Services. Go through the building, into the pool, and ask a staff member to open the emergency exit door so you can get your boat.*
4. Helmets will be available for people who wish to wear them. Please be conscious of pool edges (and other boaters) when rolling.
5. Swimming is not allowed during Kayak Pool Sessions.
  - *If attendance is low, staff may make the decision to open a few lanes for lap swimming.*
6. Campus Rec policy specifically prohibits non-staff members from doing private instruction in the pool or other parts of the facility. (Policy 2.1.3)
7. Boaters will be expected to drain water and move boats onto pool deck by themselves unless a staff offers assistance. Adequately drain your boat before leaving the pool deck.
8. Staff will determine the maximum number of boats allowed in the pool at a time. Once the pool is full, boaters will need to wait until someone leaves to enter the pool. *Please be mindful of how long you have been in the pool, and consider making space for others if you have been kayaking for 40 minutes or more.*

***Please follow and respect all directions given by CREC staff.***

***Thank you!***
