PSU - Campus Contact Tracing Matrix
Following Report of Person Diagnosed with COVID-19 on Campus

*This flowchart cannot account for all scenarios. Questions about possible exposures, contact tracing, testing, and vaccination can be directed to covidreport@pdx.edu. PSU publishes case information on the COVID-19 Case and Testing Dashboard webpage daily including date(s), building(s), and time frame(s) of on-campus cases.

SHAC initiates contact tracing:

Can the person diagnosed with COVID-19 identify close contacts?* These are people who were within 6 feet of the infected person for more than 15 minutes over a 24-hour period.

If Yes:

- Close contacts are directly notified by the COVID-19 patient or SHAC.
- Additionally, for classroom settings, SHAC notifies instructors and classmates.

If No:

- There are no close contacts who need to quarantine or stay off campus.
- Additionally, for classroom settings, SHAC notifies instructors and classmates.

VACCINATED NO SYMPTOMS

Close contacts who are vaccinated and have no symptoms are allowed to come to campus.

Test 3-5 days after exposure for COVID-19. If positive, report results to SHAC to initiate contact tracing and begin a 10-day isolation period.

VACCINATED WITH SYMPTOMS

Close contacts who are vaccinated and have COVID symptoms (cough, fever, sore throat, body aches and loss of smell) must quarantine (cannot come to campus) and contact their medical provider.

Test immediately for COVID-19. If positive, report results to SHAC to initiate contact tracing and begin a 10-day isolation period. Following the isolation period, a negative COVID test is not required to return to campus.

If negative, quarantine until 24 hours after fever is gone, without use of medications, and COVID-19 symptoms (cough, shortness of breath, and diarrhea) are improving.

UNVACCINATED

Close contacts who are unvaccinated must quarantine and contact their medical provider. Test immediately for COVID-19.

If positive, report results to SHAC to initiate contact tracing and isolate for at least 10 days after collection date (if asymptomatic) or illness onset (if symptomatic) and until 24 hours after fever is gone, without use of medications, and COVID-19 symptoms (cough, shortness of breath, and diarrhea) are improving. Following the isolation period, a negative COVID test is not required to return to campus.

If negative, quarantine for at least 10 days even if you have no symptoms OR quarantine and be retested for COVID-19 again after 7 days from exposure, ending quarantine only if the result is negative and you remain asymptomatic. Consult your medical provider to determine if a longer quarantine is necessary.

REPORT COVID-19
- Access the SHAC COVID-19 Reporting Form

COVID-19 TESTING RESOURCES
- PSU students and employees can schedule a COVID-19 test at SHAC by calling 503.725.2800.
