2010 Census Profiles

Oregon Cities Alphabetically A-C

These tables provide a summary of the data included in the 2010 Redistricting Data Summary Files released in February 2011, and comparisons to 2000 Census data. Complete data and documentation is available at www.census.gov. Additional information from the 2010 Census will be available with the release of Summary File 1 in Summer 2011.

2000 and 2010 Census Summary

Adair Village city

POPULATION BY AGE GROUP	2000		2010		2000 to 2010 Change	
Total population	536	100.0%	840	100.0%	304	56.7%
Under age 18	190	35.4%	308	36.7%	118	62.1%
Age 18 and over	346	64.6%	532	63.3%	186	53.8%

AREA AND DENSITY¹

	2000	2010	2000 to 2010 Change
Land Area - Sq. Mi. (Source: Census)	0.2	0.2	0.0
Persons per square mile	2,250.3	3,668.8	1,418.5

HOUSING OCCUPANCY STATUS

	2000	2010	2000 to 2010 Change
Total housing units	180	293	113
Occupied	170	279	109
Vacant or Seasonal	10	14	4

HISPANIC OR LATINO AND RACE²

	2000	2010	2000 to 2010 Change
Total population	536	840	304
Hispanic or Latino (of any race)	24	56	32
Not Hispanic or Latino	512	784	272
White Alone	455	707	252
Black or African American Alone	4	10	6
American Indian and Alaska Native Alone	13	9	-4
Asian Alone	7	16	9
Native Hawaiian and Other Pacific Islander Alone	8	1	-7
Some Other Race Alone	0	2	2
Two or More Races	25	39	14

RACE ALONE OR IN COMBINATION³

	2000	2010	2000 to 2010 Change
Total population	536	840	304
White	489	793	304
Black or African American	11	27	16
American Indian and Alaska Native	15	32	17
Asian	11	18	7
Native Hawaiian and Other Pacific Islander	16	9	-7
Some Other Race	21	12	-9

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

Some Other Race	9	1.7%	15	2.6%	6	66.7%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

Two or More Races	94	3.3%	85	2.8%	-9	-9.6%

RACE ALONE OR IN COMBINATION³

Total population	2,833	100.0%	3,066	100.0%	233	8.2%
White	2,723	96.1%	2,937	95.8%	214	7.9%
Black or African American	16	0.6%	18	0.6%	2	12.5%
American Indian and Alaska Native	128	4.5%	103	3.4%	-25	-19.5%
Asian	28	1.0%	49	1.6%	21	75.0%
Native Hawaiian and Other Pacific Islander	3	0.1%	14	0.5%	11	366.7%
Some Other Race	45	1.6%	56	1.8%	11	24.4%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

Some Other Race	1,151	40.3%	1,100	34.2%	-51	-4.4%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.
