

Note: The data in these profiles are from the April 1, 2010 U.S. Census. They do not contain PRC's annual population estimates.

2010 Census Profiles

Oregon Cities Alphabetically M-P

These tables provide a summary of the data included in the 2010 Redistricting Data Summary Files released in February 2011, and comparisons to 2000 Census data. Complete data and documentation is available at www.census.gov. Additional information from the 2010 Census will be available with the release of Summary File 1 in Summer 2011.

RACE ALONE OR IN COMBINATION³

Total population	5,078	100.0%	6,046	100.0%	968	19.1%
White	3,417	67.3%	4,299	71.1%	882	25.8%
Black or African American	43	0.8%	75	1.2%	32	74.4%
American Indian and Alaska Native	426	8.4%	605	10.0%	179	42.0%
Asian	33	0.6%	72	1.2%	39	118.2%
Native Hawaiian and Other Pacific Islander	24	0.5%	28	0.5%	4	16.7%
Some Other Race	1,359	26.8%	1,316	21.8%	-43	-3.2%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

RACE ALONE OR IN COMBINATION³

Total population	63,154	100.0%	74,907	100.0%	11,753	18.6%
White	58,744	93.0%	67,183	89.7%	8,439	14.4%
Black or African American	505	0.8%	1,234	1.6%	729	144.4%
American Indian and Alaska Native	1,375	2.2%	2,184	2.9%	809	58.8%
Asian	1,105	1.7%	1,749	2.3%	644	58.3%
Native Hawaiian and Other Pacific Islander	275	0.4%	620	0.8%	345	125.5%
Some Other Race	3,245	5.1%	5,136	6.9%	1,891	58.3%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

Asian	0	0.0%	9	2.1%	9	--
Native Hawaiian and Other Pacific Islander	4	1.0%	3	0.7%	-1	-25.0%
Some Other Race	42	10.2%	20	4.6%	-22	-52.4%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

RACE ALONE OR IN COMBINATION³

	2000	2010	2000 to 2010 Change
Total population	9,532	9,989	457
White	8,694	8,776	82
Black or African American	78	112	34
American Indian and Alaska Native	353	398	45
Asian	214	258	44
Native Hawaiian and Other Pacific Islander	33	37	4
Some Other Race	463	837	374

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

Total population	10,985	100.0%	11,366	100.0%	381	3.5%
White	7,941	72.3%	8,280	72.8%	339	4.3%
Black or African American	91	0.8%	129	1.1%	38	41.8%
American Indian and Alaska Native	218	2.0%	300	2.6%	82	37.6%
Asian	356	3.2%	330	2.9%	-26	-7.3%
Native Hawaiian and Other Pacific Islander	34	0.3%	20	0.2%	-14	-41.2%
Some Other Race	2,732	24.9%	2,720	23.9%	-12	-0.4%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.

Native Hawaiian and Other Pacific Islander	2	0.2%	2	0.2%	0	0.0%
Some Other Race	21	1.8%	11	1.0%	-10	-47.6%

1. Differences in land area between 2000 and 2010 may reflect actual boundary changes such as annexations, or may result from changes in Census Bureau geographic methods.

2. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

3. Data are shown for the 6 race alone or in combination categories. The concept "race alone or in combination" includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept "race alone or in combination," therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race "alone or in combination" categories may add to more than the total population because people who reported more than one race were tallied in each race category.
