2000 and 2010 Comparison Profiles

Census 2000 Geography

Hood River County Census Tracts

These tables provide a summary of the data included in the 2010 Redistricting Data Summary Files released in February 2011, and comparisons to 2000 Census data. Complete data and documentation is available at www.census.gov. Additional information from the 2010 Census will be available with the release of Summary File 1 in Summer 2011.
Tract outline maps are under construction.

</table>

1. Data are shown for the Hispanic or Latino population, as well as for people who reported one race and for people who reported two or more races. The population of One Race is the total of the population in the 6 categories of one race. The population of Two or More Races is the total of the population in the 57 specific combinations of two or more races. The redistricting files include data for all 63 groups.

2. Data are shown for the 6 race alone or in combination categories. The concept “race alone or in combination” includes people who reported a single race alone (e.g., Asian) and people who reported that race in combination with one or more of the other major race groups (i.e., White, Black or African American, American Indian and Alaska Native, Native Hawaiian and Other Pacific Islander, and Some Other Race). The concept “race alone or in combination,” therefore, represents the maximum number of people who reported as that major race group, either alone, or in combination with another race(s). The sum of the 6 individual race “alone or in combination” categories may add to more than the total population because people who reported more than one race were tallied in each race category.
