SDHI ANNOUNCEMENTS

- Next RIP presentation is Wednesday, February 12th from 9-10:30am in Rm 413, Market Street Building (1600 SW 4th Ave.)

  Presenter:  Dr. Julie Reeder, Senior Research Analyst, Oregon WIC program

  Title: Oops?! I did it again: Exploring Closely Spaced Pregnancies among Oregon WIC participants

FUNDING OPPORTUNITIES

- Prevention and Treatment of Obesity, Diabetes, and Chronic Kidney Disease in Military Populations (R01) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-12-048.html

- Planning Grants for Translational Research to Improve Obesity and Diabetes Outcomes (R34) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-12-173.html

- Translational Research to Improve Obesity and Diabetes Outcomes (R18) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-12-172.html

- Juvenile Protective Factors and Their Effects on Aging (R03) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-14-022.html

- Women & Sex/Gender Differences in Drug and Alcohol Abuse/Dependence (NIH); http://grants.nih.gov/grants/guide/pa-files/PA-14-036.html

- American Music Therapy Association: Arthur Flagler Fultz Research Award; http://www.musictherapy.org/research/fultz/

WORKSHOPS, LECTURES, AND CONFERENCES

- ADS Center Offers Webinar on Affordable Care Act; http://www.esibethesda.com/adsteleconference/overview.htm

- Presentation at PSU: Healthy Relationships, Native Style!; https://www.facebook.com/events/639857152717673/

SDH ANNOUNCEMENTS

Next RIP presentation is Wednesday, February 12th from 9-10:30am in Rm 413, Market Street Building (1600 SW 4th Ave.)

Presenter:  Dr. Julie Reeder, Senior Research Analyst, Oregon WIC program

Title:  Oops?! I did it again: Exploring Closely Spaced Pregnancies among Oregon WIC participants

Description:  Each year just under half of all infants in the United States are born to mothers who are enrolled in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). The majority of women enroll while pregnant and they can continue in the program through six months or one year postpartum, depending on their breastfeeding status. By initiating services in the prenatal period and continuing them into the postpartum phase WIC has the unique opportunity to interact with women during the periconceptual stage, the critical early weeks of a pregnancy and the time period before a subsequent conception.

This mixed methods study will address the relationship between interpregnancy interval (IPI) and maternal health outcomes. An embedded mixed methods design will be used in which one data set provides a supportive, secondary role in relationship to the first data set. The primary purpose of this study is to use birth certificate records and data from the Oregon WIC program to explore the relationship between birth spacing and maternal health so as to best target women at risk for a short IPI. A secondary purpose will be to gather qualitative interview data that will explore women’s perceptions about birth spacing, periconceptual health behaviors, and WIC’s potential influence in both areas.

Stage of Development: Funded by the WIC and Periconceptual Nutrition Grant

Stage of Work: Beginning data analyses and interviews- looking for ideas on additional areas to explore both with the quantitative data set and the interviews

FUNDING OPPORTUNITIES

Prevention and Treatment of Obesity, Diabetes, and Chronic Kidney Disease in Military Populations (R01) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-12-048.html

The goal of this FOA is to encourage Research Project Grant (R01) applications on prevention and treatment of obesity, diabetes, and chronic kidney disease in military personnel (active duty and retired) and their families.
Planning Grants for Translational Research to Improve Obesity and Diabetes Outcomes (R34) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-12-173.html

The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) and the National Institute of Mental Health (NIMH) encourage NIH Clinical Trial Planning Grant Program grant (R34) applications from institutions/organizations to develop and pilot test practical, sustainable, acceptable, and cost efficient adaptations of efficacious strategies or approaches prevent and treat diabetes and/or obesity. Research must target the prevention or reversal of obesity, prevention of type 2 diabetes, improved care of type 1 and type 2 diabetes, or the prevention or delay of the complications of these conditions. NIMH encourages research focused on people with severe mental illness (SMI), whose risk for obesity and type 2 diabetes is twice that of the general population. The approaches tested should have the potential to be widely disseminated to clinical practice, individuals and communities at risk.

Translational Research to Improve Obesity and Diabetes Outcomes (R18) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-12-172.html

The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) encourages NIH Research Demonstration and Dissemination Project grant (R18) applications from institutions/organizations to test practical, sustainable, acceptable, and cost efficient adaptations of efficacious strategies or approaches prevent and treat diabetes and/or obesity. Research must target the prevention or reversal of obesity, prevention of type 2 diabetes, improved care of type 1 and type 2 diabetes, or the prevention or delay of the complications of these conditions. The approaches tested should have the potential to be widely disseminated to clinical practice, individuals and communities at risk.

The purpose of this funding opportunity announcement (FOA) is to develop, adapt, and test the effectiveness of health promotion and disease prevention interventions in Native American (NA) populations. NA populations are exposed to considerable risk factors that significantly increase their likelihood of chronic disease, substance abuse, mental illness, and HIV-infection. The intervention program should be culturally appropriate and promote the adoption of healthy lifestyles, improve behaviors and social conditions and/or improve environmental conditions related to chronic disease, the consumption of tobacco, alcohol and other drugs, mental illness or HIV-infection. The intervention program should be designed so that it could be sustained within the entire community within existing resources, and, if successful, disseminated in other Native American communities. The long-term goal of this FOA is to reduce mortality and morbidity in NA communities. For the purposes of this FOA Native Americans include the following populations: Alaska Native, American Indian, and Native Hawaiian. The term ‘Native Hawaiian’ means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii.

Women & Sex/Gender Differences in Drug and Alcohol Abuse/Dependence (NIH); http://grants.nih.gov/grants/guide/pa-files/PA-14-036.html

The purpose of this Funding Opportunity Announcement (FOA) is to advance research on male-females differences in drug and alcohol abuse and addiction and on factors specific to women. Both human and animal model studies are sought.

Juvenile Protective Factors and Their Effects on Aging (R03) (NIH); http://grants.nih.gov/grants/guide/pa-files/PAR-14-022.html

The purpose of this FOA is to invite pilot/feasibility projects on: 1) descriptive studies to identify putative juvenile protective factors, 2) experimental studies to test hypotheses about their effects on
aging and 3) translational studies to explore the potential risks and benefits of maintaining or modulating the level of juvenile protective factors in adult life.

United States Agency for International Development (USAID), the Government of Norway, the Bill & Melinda Gates Foundation, Grand Challenges Canada, and UK’s Department of International Development (DFID) have joined together to launch the fourth round of Saving Lives at Birth: A Grand Challenge for Development. Together, we call for groundbreaking prevention and treatment approaches for pregnant women and newborns in poor, hard-to-reach communities around the time of childbirth.

*Submission Deadlines:* March 1st and September 1st

The AAFP/F Research Committee (RC) recognizes the increasing interest and demand for research projects conducted through practice based research networks. Research conducted in a family medicine setting will lead to improvements in the quality of care people receive when they go to the doctor—it makes a difference in people’s lives.

**Eligibility**
- Grant applications are accepted from family physicians who are affiliated/associated with a PBRN in Family Medicine.
- The principal investigator must be a family physician who is a member of the AAFP at the time of application.

**WHAT QUALIFIES**
- Pilot projects or preliminary efforts involving research conducted through practice based research networks in family medicine settings. Projects should lead to the completion of a larger research project or be a catalyst for a large-scale project.

**American Music Therapy Association;** Arthur Flagler Fultz Research Award; [http://www.musictherapy.org/research/fultz/](http://www.musictherapy.org/research/fultz/)

The purpose of this award is to encourage, promote, and fund music therapy research and to explore new and innovative music therapy treatments. The Fund seeks to support research in the field of music therapy in the following areas: Clinical Research and Health Services Research.

**WORKSHOPS, LECTURES, AND CONFERENCES**

The ECR program was developed to: train qualified scientists without prior CSR review experience to become effective reviewers; help emerging researchers advance their careers by exposing them to peer review; enrich the existing pool of NIH reviewers by including scientists from less research-intensive institutions as well as those from traditionally research-intensive institutions.

**ADS Center Offers Webinar on Affordable Care Act:** [http://www.esibethesda.com/adsteleconference/overview.htm](http://www.esibethesda.com/adsteleconference/overview.htm)
On February 12, 2014, at 3 pm. ET (2 p.m. CT; 12 p.m. PT), the Resource Center to Promote Acceptance, Dignity and Social Inclusion Associated with Mental Health (ADS Center) will offer a free webinar entitled "Time to Get Insured: Learn the Who, What, Why, and How to Enroll in Health Insurance Through the Medicaid Expansion or the State or Federal Marketplace." Join us to learn how to navigate the new insurance landscape and better equip yourself to enroll yourself, your family, your clients, or your loved ones in the new coverage available under the Affordable Care Act.

Presentation at PSU: Healthy Relationships, Native Style!
https://www.facebook.com/events/639857152717673/

Date: Thursday, February 13th; 6:00pm - 8:00pm  
Location: Native American Student & Community Center; Room 170

This two-hour workshop, presented by Jillene Joseph (Gros Ventre) Executive Director of the Native Wellness Institute, will focus on creating and maintaining a healthy relationship. The lessons are based on the teachings of our Native American ancestors and tribal elders and will focus on healthy sexuality, choosing healthy partners, dating and courtship, healthy communication, and gender roles in relationships. The workshop will be interactive and fun, and is designed for single individuals, dating or married couples, and domestic partners.

Free workshop. Open to all. Light Refreshments provided.

CALL FOR PAPERS & PRESENTATIONS

Community Health Planning and Policy Development; 142nd APHA Annual Meeting and Exposition  
Healthography: How Where you Live Affects Your Health and Well-being;  
https://apha.confex.com/apha/142am/chppd.htm

Submission Deadline: Tuesday, February 11, 2014

The Community Health Planning and Policy Development section (CHPPD) develops and advocates for health planning, policies and practices to promote health equity, community empowerment and social justice. Through the conference, CHPPD hopes to foster continued discourse, interdisciplinary collaboration and translation of practice to policy.

The section invites abstracts which further these objectives while encompassing the section’s mission. In addition, the section also invites scientific sessions and posters which address relevant planning, policy and community development themes aligning with the 2014 APHA Annual Meeting theme, "Healthography: How Where You Live Affects Your Health ". Specifically, we seek abstracts which address one or several of the themes outlined below:

- America's Changing Neighborhoods
- Barriers to Policy Implementation
- Community Based Participatory Research (CBPR)
- Community Development and Positive Change
- Energy and Sustainability
- Environmental exposures and health
- Health in All Policies (HiAP) Public Health Approaches
- Methodological Advances in Healthography
- Models and Tools of Effective Advocacy
- Neighborhood Redevelopment and Resilience
- Positive Action Approaches to Reducing Disparities and Improving Health Equity
- Successful Collaborations and Collective Impact
- The Affordable Care Act (ACA): Impact, Implementation and Challenges
2014 HHS Teen Pregnancy Prevention Grantee Conference - Bridging the Gaps: Eliminating Disparities in Teen Pregnancy and Sexual Health;
http://www.faingroup.com/tppconference/Abstract_Submission.asp

This conference will bring together, for the first time, all federally-funded teen pregnancy prevention and adolescent sexual health grantees from the Administration for Children and Families (ACF), Family and Youth Services Bureau (FYSB); the Centers for Disease Control and Prevention (CDC), Division of Adolescent and School Health (DASH) and the CDC Division of Reproductive Health (DRH); and the Office of the Assistant Secretary for Health (OASH), Office of Adolescent Health (OAH). Abstracts should focus on the cutting edge practices, research, and emerging trends in the fields of teen pregnancy and sexual health. Abstracts should also emphasize ways that federal grantees can strengthen their teen pregnancy and sexual health programs and eliminate disparities in teen pregnancy and sexual health among diverse groups of youth in the United States.

Mathematica Policy Research seeks studies for a review that will assess the evidence base of out-of-home early care and education (ECE) models for infants and toddlers (from birth to age 3). The review is being conducted by Mathematica for the Office of the Assistant Secretary for Planning and Evaluation (ASPE), in partnership with the Office of Planning, Research & Evaluation (OPRE) within the U.S. Department of Health and Human Services. It will be used to help inform policy, new initiatives, and program directions at the federal level.

RESOURCES

Public Use Data (2008-10) on Neighborhood Effects on Obesity and Diabetes Among Low-Income Adults from the All Five Sites of the Moving to Opportunity Experiment;
http://www.icpsr.umich.edu/icpsrweb/ICPSR/studies/34974/version/1

Moving to Opportunity (MTO) is a randomized housing experiment administered by the United States Department of Housing and Urban Development that gave low-income families living in high-poverty areas in five cities the chance to move to lower-poverty areas. Families were tracked from baseline (1994-1998) through the long-term evaluation survey fielding period (2008-2010) with the purpose of determining the effects of "neighborhood" on participating families. This data collection includes data from the 3,273 adult interviews completed as part of the MTO long-term evaluation.

Systematic Review of School-Based Programs to Reduce Bullying and Victimization, 1983-2009;
http://www.icpsr.umich.edu/icpsrweb/NACJD/studies/31703/version/1

The purpose of this systematic review was to assess the effectiveness of school-based anti-bullying programs in reducing school bullying.

WHO Study on Global AGEing and Adult Health (SAGE): Wave 1, 2007-2010;
http://www.icpsr.umich.edu/icpsrweb/NACDA/studies/31381/version/1

The World Health Organization (WHO)'s Study on Global Ageing and Adult Health (SAGE) is a longitudinal follow-up of a cohort of ageing and older adults. These data will address data gaps on ageing, adult health and well-being in lower and middle income countries, whilst being comparable to surveys conducted in higher income countries (such as the United States’ Health and Retirement Study (HRS), English Longitudinal Study of Ageing (ELSA), and the Survey of Health, Ageing and Retirement in Europe (SHARE).
This policy brief is the first in a new series released by The Institute for Research on Poverty and focuses on family complexity and how family structure has changed in the past 50 years.

This study examined trends in rural-urban disparities in life expectancy at birth in the U.S. between 1969 and 2009.

The Commonwealth Fund's Affordable Care Act Tracking Surveys measure public awareness of the new marketplaces and what Americans are experiencing as they shop for health plans.

Under the direction of the Executive Director and in collaboration with the OCADSV Program Coordinator team, the Equity & Inclusion Coordinator will develop and implement a program of community organization, systems advocacy, training, and technical assistance for domestic violence and sexual assault programs regarding anti-oppressive domestic and sexual violence prevention and intervention practices. This includes careful analysis of how systems of oppression such as, but not limited to, racism, sexism, heterosexism, ageism, ableism, citizenship status, and an English-centric society intersect to foster additional oppressions and barriers for survivors of domestic and sexual violence.

As the Program Specialist you will support the Defending Childhood Initiative to develop a coordinated, county-wide approach to promoting healthy relationships and safe environments for children and youth. Additionally, you will support prevention focused efforts with an emphasis on supporting the public school district, staff, the public, and community-based programs serving children.

The majority of your work as the Program Specialist will be conducted within the SUN Service System and the six local school districts that we partner with, in addition to other community-based service providers or educational organizations. In these settings, you will conduct focused activities that are designed to increase the capacity of existing systems to recognize and appropriately respond to children's exposure to violence. Your role will include providing technical assistance and training to a wide range of educational and social service staff and developing tools and training that support changes in policy and
practice. Your work with school districts will also include development and piloting of online training for school staff on exposure to violence.
