Are you interested in how behavior is learned, how it changes over time and experiences, and how you can analyze and change behavior to improve lives? If so, you may want to pursue becoming a BCBA®*. PSU’s ABA program is fully online and provides the coursework that prepares students with the knowledge and skills to become Board Certified Behavior Analysts® (BCBA®) as part of Pathway 2 eligibility outlined by the Behavior Analysis Certification Board. In addition, the program includes a number of added curricular areas of focus, including an explicit emphasis on the use of Positive Behavior Interventions and Support (PBIS), Telehealth/Technology and use of behavioral support within early childhood settings.

*Applicants will need to meet additional requirements before they can be deemed eligible to take the BCBA® examination. Please refer to bacb.com/bcba for additional requirements.
