- Information sessions held throughout the year

Special Education—where every child learns

Graduates of the Special Education program work with students who have a wide range of learning, mental, emotional, and physical disabilities. They are prepared to adapt and teach general education, reading, writing, and math lessons to students with mild and moderate disabilities. They are also equipped to teach basic skills, such as literacy and communication techniques, to students with severe disabilities.

With millions of students nationwide receiving special education services, there is a demand for highly educated teachers who can work with students at all skill levels.
